Thereafter, unless previously redeemed, the NC5.5 Notes will bear interest from and including the NC5.5 First Modified Reset Date to but excluding 22 April 2045 (the "**NC5.5 Second Modified Reset Date**") at a rate *per annum* equal to the Reference Rate for the relevant Reset Period plus a margin of 150.9 basis points per annum (including a step-up of 25 basis points). Thereafter, unless previously redeemed, the NC5.5 Notes will bear interest from and including the NC5.5 Second Modified Reset at a rate *per annum* equal to the Reference Rate for the relevant Reset Period plus a margin of 225.9 basis points per annum (including a step-up of 100 basis points).

Interest on the NC5.5 Notes will be payable annually in arrear on 22 April of each year, commencing on 22 April 2020 (short first coupon).

The NC10 Notes will bear interest from and including the Interest Commencement Date to but excluding 18 October 2029 (the "**NC10 First Reset Date**") at a rate of 1.600 per cent. *per annum*. Thereafter, unless previously redeemed, the NC10 Notes will bear interest from and including the NC10 First Reset Date to but excluding 18 October 2049 (the "**NC10 Modified Reset Date**") at a rate *per annum* equal to the Reference Rate for the relevant Reset Period (each as defined in § 3(2) of the terms and conditions of the NC10 Notes (the "**NC10 Terms and Conditions**" and together with the NC5.5 Terms and Conditions, the "**Terms and Conditions**") plus a margin of 189.4 basis points per annum (including a step-up of 25 basis points). Thereafter, unless previously redeemed, the NC10 Notes will bear interest from and including the NC10 Modified Reset Date at a rate *per annum* equal to the Reference Rate for the relevant Reset Period plus a margin of 264.4 basis points per annum (including a step-up of 100 basis points).

Interest on the NC10 Notes will be payable annually in arrear on 18 October of each year, commencing on 18 October 2020.

The Issuer is entitled to defer interest payments under each Series of Notes under certain circumstances (as set out in § 4(1) of the Relevant Terms and Conditions) (such payments the "**Deferred Interest Payments**"). Such Deferred Interest Payments will not bear interest. The Issuer may pay such Deferred Interest Payments (in whole or in part) at any time upon due notice (as set out in § 4(2) of the Terms and Conditions) and will be required to pay such Deferred Interest Payments (in whole, but not in part) under certain other circumstances (as set out in § 4(3) of the Terms and Conditions).

This prospectus (the "**Prospectus**") does not constitute a prospectus within the meaning of Regulation (EU) No 1129/2017 of the European Parliament and of the Council of 14 June 2017 (as amended, the "**Prospectus Regulation**"). Neither the Luxembourg Financial Supervisory Authority, the *Commission de Surveillance du Secteur Financier*, nor any other "competent authority" (as defined in the Prospectus Regulation) has approved this Prospectus or reviewed information contained in this Prospectus.

This Prospectus constitutes a prospectus for the purpose of the Luxembourg Law of 16 July 2019 on Prospectuses for Securities, as amended. Application has been made to list the Notes on the official list (the "**Official List**") of the Luxembourg Stock Exchange and for admission to trading of the Notes on the Euro MTF Market operated by the Luxembourg Stock Exchange, which is a multilateral trading facility for the purposes of Directive 2014/65/EU of the European Parliament and of the Council on markets in financial instruments, as amended, ("**MiFID II**"), and, therefore, not an EU-regulated market.

This Prospectus will be published in electronic form together with all documents incorporated by reference on the website of the Luxembourg Stock Exchange (www.bourse.lu).

This Prospectus does not constitute an offer to sell, or the solicitation of an offer to buy, the Notes in any jurisdiction where such offer or solicitation is unlawful.

The Notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and subject to certain exceptions, the Notes may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons.

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Following the respective First Reset Date, interest amounts payable under each Series of the Notes are calculated by reference to the annual swap rate for swap transactions denominated in Euro with a term of 5 years, which appears on the Reuters Screen Page ICESWAP2 and which is provided by ICE Benchmark Administration Limited ("**IBA**"). As at the date of this Prospectus, IBA appears on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmark Regulation (Regulation (EU) 2016/1011) (the "**Benchmark Regulation**").

Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risks and that they consider the suitability of the Notes as an investment in light of their own circumstances and financial condition. Investing in the Notes involves certain risks. Please review the section entitled "*Risk Factors*" beginning on page 7 of this Prospectus.

MIFID II PRODUCT GOVERNANCE / TARGET MARKET: PROFESSIONAL INVESTORS AND ECPS ONLY

Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of both Series of Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the manufacturers' target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

PRIIPS REGULATION / PROHIBITION OF SALES TO EEA RETAIL INVESTORS

FORWARD-LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements. A forward-looking statement is a statement that does not relate to historical facts and events. They are based on analyses or forecasts of future results and estimates of amounts not yet determinable or foreseeable. These forward-looking statements are identified by the use of terms and phrases such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "predict", "project", "will" and similar terms and phrases, including references and assumptions. This applies, in particular, to statements in this Prospectus containing information on future earning capacity, plans and expectations regarding the Group's business and management, its growth and profitability, and general economic and regulatory conditions and other factors that affect it.

Forward-looking statements in this Prospectus are based on current estimates and assumptions that the Issuer makes to the best of its present knowledge. These forward-looking statements are subject to risks, uncertainties and other factors which could cause actual results, including the Group's financial condition and results of operations, to differ materially from and be worse than results that have expressly or implicitly been assumed or described in these forward-looking statements. The Group's business is also subject to a number of risks and uncertainties that could cause a forward-looking statement, estimate or prediction in this Prospectus to become inaccurate. Accordingly, investors are strongly advised to read the section "*Description of the Guarantor and the Group*" of this Prospectus. This section includes more detailed descriptions of factors that might have an impact on the Group's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions, future events described in this Prospectus may not occur. RISK FACTORS

Before deciding to purchase the Notes, investors should carefully review and consider the following risk factors and the other information contained in this Prospectus. Should one or more of the risks described below materialise, this may have a material adverse effect on the business, prospects, shareholders' equity, assets, financial position and results of operations (Vermögens-, Finanz- und Ertragslage) or general affairs of the Issuer, the Guarantor or the Group. Moreover, if any of these risks occur, the market value of the Notes and the likelihood that the Issuer or the Guarantor will be in a position to fulfil their payment obligations under the Notes or the Subordinated Guarantees, respectively, may decrease, in which case the holders of the Notes (the "Noteholders") could lose all or part of their investments. Factors which the Issuer and the Guarantor believe may be material for the purpose of assessing the market risks associated with the Notes are also described below.

The Issuer and the Guarantor believe that the factors described below represent the principal risks inherent in investing in the Notes, but the Issuer may be unable to pay interest, principal or other amounts on or in connection with the Notes for other unknown reasons than those described below. Additional risks of which the Group is not presently aware could also affect the business operations of the Group and have a material adverse effect on the Group's business activities and financial condition and results of operations. Prospective investors should read the detailed information set out elsewhere in this Prospectus (including any documents incorporated by reference herein) and reach their own views prior to making any investment decision.

Words and expressions defined in the Terms and Conditions of the Notes below shall have the same meanings in this section.

Potential investors should, among other things, consider the following:

Risks relating to the Issuer

Financing subsidiary

As a financing company, the Issuer in general faces the risk that loans granted by it may not be repaid when due and payable for whatever reason.

All loans are granted to either Deutsche Bahn AG or to one of its Group companies. Therefore, the risk of no repayment is directly dependent on Deutsche Bahn AG.

The ability of Deutsche Bahn AG to meet its obligations under the Subordinated Guarantees is influenced by the risk factors outlined in the subsection entitled "*Risks relating to the Guarantor and DB Group*" below. As a consequence, these risk factors also apply with regard to the Issuer.

Risks relating to the Guarantor and DB Group

Economic climate, market and competition

Demand for DB Group's mobility services and, in particular, for its transport and logistics services is dependent on the overall economic development, among other things:

- Economic growth fuels the trends underlying its strategy in its operating markets.
- Macroeconomic shocks such as economic and financial crises and economic fluctuations may adversely affect DB Group's business.
- The development of key economic factors (such as disposable income or the number of persons in active employment) is particularly important for passenger transport.
- Risks arising from depleted public-sector budgets could have adverse effects (particularly in the form of spending cuts), especially on DB Arriva activities.

Developments in the competitive environment are of particular importance for DB Group:

- In long-distance transport, DB Group is exposed to heavy inter- and intramodal competition, particularly with motorized individual transport as the dominant competitor, but also with long-distance bus services and air transport. Increased competition has a negative impact on price perception.
- There is intense competition in regional transport throughout Europe for securing long-term contracts. The market volume is largely determined by the financial situation of the contracting organizations. As a result, DB Group may lose revenues and profits.
- There is a risk of performance loss or failure to win tenders. To be able to compete in this market, DB Group is constantly working to optimize its tender management and cost structure. Furthermore, depending on the contract type, there is also the risk of a loss of passengers without the possibility of being able to adapt the operating schedules.
- There is fierce intramodal and considerable intermodal competitive pressure in the rail freight transport industry. Risks arise from the fact that competitors can operate with less expensive cost structures while enjoying greater flexibility, and from possible future efficiency gains of trucks (for example, by platooning).
- In the freight forwarding business, there is both intense competition with other providers and a concentration in the carrier market, which causes changes in the offerings of cargo space with corresponding effects on the purchase and sales prices.

Production and technology

If the quality of passenger transport services suffers, this has an impact on production and service quality and can lead to the loss of customers. Postponed deliveries of new vehicles may result in revenue losses and additional expenses, for example, due to substitute transport services or penalty payments.

The availability and the technical condition of rail infrastructure are significant prerequisites for competitive rail transport. In order to maintain the future viability of rail in the long term, it is also necessary to modernize the infrastructure through digitalization and automation. Intense construction work on the network affects schedules and the production quality of carriers, part of which may not be compensated.

The range and quality of the services depend to a significant extent on the availability and reliability of the production resources used, intermediate services procured and the quality of any partners' services. Deutsche Bahn therefore keeps up an intense dialog with its suppliers and business partners on the subject of quality. This is of particular importance in the vehicle industry.

Ensuring sufficient availability of DB Group's vehicle fleet is particularly critical. Significant restrictions on resources jeopardize operating schedules. In regional transport, there is the additional risk of penalties being imposed by the relevant contracting organizations if trains are cancelled or delayed.

The technical production resources used in rail transport must comply with applicable standards and any requirements, which are potentially subject to change. Deutsche Bahn may receive technical complaints concerning its vehicles, creating the risk that Deutsche Bahn may only be permitted to use individual series or rail car types under certain conditions, such as limited speeds, shorter intervals between maintenance or reduced wheel set loads. In addition, Deutsche Bahn cannot accept newly purchased vehicles that have flaws or for which the necessary vehicle certification has not been granted.

Technical defects or requirements may make modifications to vehicles necessary, potentially leading to significant restrictions of availability or even temporary suspensions of such vehicles.

In regional transport, cost risks can arise from the redundancy of vehicles following the expiry or re-tendering of a transport contract.

Increasing digitalization leads to a higher dependence on secure and constantly available IT systems. This will result in risks, such as the interruption of the availability of IT systems or unauthorized third parties accessing customer data.

Personnel

Given the competitive environment, DB Group's staff cost structure plays an important role. The competitive environment might result in labour disputes or even strikes. DB Group's intention is to conclude competitive collective agreements in terms of the labour market and the transport market. Due to demographic changes and the associated lack of skilled employees, it is becoming increasingly difficult to fill vacancies with qualified personnel. This in turn leads to risks such as lack of know-how transfer and the restriction of opportunities for career development.

Regulation

Regulation to the detriment of rail (for example due to additional legislative requirements) has the potential to endanger intermodal competitiveness. Changes to the legal framework at a national or European level could pose risks to DB Group's business. This general regulatory risk could result in tangible negative effects on DB Group's revenues and profit.

These regulations govern the individual components of the pricing systems, and the general terms and conditions applied by DB Group's Railway Infrastructure Companies so that margins can come under pressure or even become negative.

Political risks concern particularly a tightening of existing standards and regulations affecting the railways (e.g. passenger rights). The structure of DB Group may also be exposed to regulatory risks.

Procurement/energy market

Purchase prices for raw materials, energy and transport services vary according to market conditions.

DB Group responds to the risk of increasing energy prices by using among other things appropriate derivative financial instruments and entering into long-term procurement contracts. However, these safeguards also limit opportunities arising from trends in energy prices. In the event of falling prices, DB Group does not benefit from the market development.

This means that depending on the market and competitive situation, it may not be possible, or may only be possible to a very limited extent, to pass increased costs on to the customer in the short term. This in turn has a negative impact on margins.

Noticeable train-path price increases outside of Germany result in significant cost increases for the use of infrastructure. Due to the intensity of competition, it is not always possible to pass on cost increases.

Foreign exchange, pensions and taxes

A currency risk arises from DB Group's international business. This risk is largely limited to the so-called translation risk, since usually there is a high regional congruence between the production and sales markets. DB Group uses primary and derivative financial instruments to address interest rate, currency and energy price risks from its operating business. There is a risk that these hedging measures will not pay off.

Pensions and similar retirement benefit obligations are partially covered by plan assets from stocks, real estate, fixed-income securities and other investments. Value losses in these assets directly reduce the cover of pension plan obligations, potentially resulting in DB AG having to provide additional cover.

In addition, there are potential risks from retrospective tax payments from tax audits that are in progress, and from amendments to tax laws.

Law and contracts

As a result of delayed vehicle deliveries and vehicle defects, operating difficulties and breaches of contract or non-compliance events arise with respect to contracting organizations in regional transport. Higher expenses and penalty payments combined with lower revenues from fares are the result. Ensuing damage claims are asserted against the manufacturers. Provisions have been made for legal and contractual risks based on an assessment of their probability of occurrence, but there is a risk that such provisions may turn out to be insufficient.

With its very high purchasing volume and over 40,000 suppliers, DB Group is one of the largest purchasers in Germany. Large-scale capital expenditures mean that the infrastructure business units in particular are exposed to a significant risk of becoming the target and victim of corruption, cartel agreements or fraud. As a provider of grants, the Federal Government places high demands on DB Group with its anti-corruption guidelines.

Significant events

DB Group's activities as a train-operating company are based on a technologically complex, networked production system. In general, DB Group tries to combat the risk of potential operational disruptions through regular maintenance and hiring qualified employees, along with continuous quality assurance and improvement of its processes but there can be no assurance that these measures will turn out to be sufficient at all times.

The nature of rail transport as an open system means that certain factors (such as natural disasters, accidents, sabotage and theft) over which DB Group has only limited influence could have a negative impact on operations. Its efforts in such cases focus on minimizing the potential effects. However, this could also result in cost risks from countermeasures and reputational risks.

Damage to the rail infrastructure caused by extreme weather events results, among other things, in a loss of income, penalty payments and a higher resource requirement for repairing damages and preventative measures.

Additional measures to improve public security in passenger stations and other areas (for example, higher requirements for the quality and quantity of video surveillance), may result in additional costs.

Project risks

DB Group's business operations not only involve huge capital expenditure volumes, but also a large number of highly complex projects. Changes to the legal framework, delays in implementation (including due to ever-more comprehensive public consultation) or necessary adjustments during terms (often lasting several years), deviations from the ramp-up curve of funds for capital expenditures agreed with the Federal Government or changes to purchase prices may lead to project and liquidity risks. In case of delays in completion, planned modal shifts from road to rail will not be feasible.

With the implementation of planned profit and efficiency gains from various business-unit-specific programs and projects (such as Agenda for a Better Railway for the integrated rail system in Germany or Primus at DB Schenker), there is the risk that it will either not be possible to implement the planned effects at all, or only to a limited extent and/or with delays.

Infrastructure Financing

As a key element of the German Rail Reform, the Federal Government has the constitutional obligation to finance capital expenditures in rail infrastructure. The key factor here is securing sufficient funding, but also the ability to plan the availability of funding for the existing network as well as new construction and expansion (requirement plan capital expenditures). A limited availability may lead to less funding being available to maintain the existing network or overcome shortages, thereby restricting the competitiveness of rail as a mode of transport.

DB Group has an agreement with the Federal Government that sets out the financing of the existing network until 2019. Risks result from a potential failure to achieve the quality objectives specified in this Service and Financing Agreement (*Leistungs- und Finanzierungsvereinbarung – the "LuFV"*) II (for more information on the LuFV II see: "*Description of the Guarantor and the Group – Financial Relationship with the Federal Republic of Germany or the Federal States*") and may result in a possible reclaim by the Federal Government based on an audit of the proper use of Federal funds. Currently the LuFV III is under negotiation and should come into force on 1 January 2020.

The profits of infrastructure companies in turn are ploughed back into the infrastructure via the so-called "financing circle". Risks result from a potential failure to achieve the contract objectives specified in the LuFV II and from a possible reclaim by the Federal Government based on an audit of the proper application of funds.

The economic sustainability of capital expenditures or contributions to capital expenditure projects funded with DB funds is essential to ensure DB Group's ability to invest in the long term.

Political risks

DB Group is active in Great Britain through DB Arriva, DB Schenker and DB Cargo. The ongoing uncertainty regarding the modalities of Great Britain's exit from the European Union (Brexit) poses a risk to DB Group's activities. Here, it is primarily a weakening of the British economy and new trade restrictions hindering freight transport that may have a negative impact. DB Group is responding by preparing as best as possible for a so-called "disorderly Brexit" (Brexit without any exit agreement).

The European Company for the Financing of Railroad Rolling Stock (*Europäische Gesellschaft für die Finanzierung von Eisenbahnmaterial – "EUROFIMA"*) has given loans to state-owned railways in states that now have poor credit ratings. If these state-owned railways fail to meet their financial obligations to EUROFIMA, this could have repercussions for the carrying amount of the investment, and, under certain circumstances, trigger further financial obligations. Deutsche Bahn AG could be affected through certain contingent liabilities in relation to some of Eurofima's obligations.

Risks relating to the Notes

The Notes may not be a suitable investment for all investors

Potential investors should consider whether an investment in the Notes is appropriate in their respective circumstances and should consult with their legal, business, and tax advisors to determine the consequences of an investment in the Notes and to get their own idea about the investment.

An investment in the Notes is only suitable for investors who

- possess the required knowledge and experience in financial and business matters to evaluate the chances and risks of an investment in the Notes and the information contained or incorporated by reference into the Prospectus;
- have access to, and knowledge of, appropriate analytical tools to evaluate such chances and risks in the context of the potential investor's particular financial situation and to evaluate the impact the Notes will have on their overall investment portfolio;
- understand thoroughly the terms of the Notes and are familiar with the behaviour of the financial markets;
- are capable of bearing the economic risk of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor's currency;
- know that it may not be possible to dispose of the Notes for a substantial period of time, if at all; and
- are able to evaluate (either alone or with the help of a financial advisor) possible scenarios for economic, interest rate and other factors that may affect its investment and ability to bear the applicable risks.

The Notes are undated securities in which an investment constitutes a financial risk for an indefinite period.

The Issuer is under no obligation to redeem the Notes. The Noteholders have no right to call for redemption of the Notes. Therefore, prospective investors should be aware that they may be required to bear the financial risks of an investment in the Notes for an indefinite period and may not recover their investment in the foreseeable future, if at all.

The Notes are subordinated to senior and subordinated obligations of the Issuer.

The obligations of the Issuer under the Notes will be unsecured subordinated obligations of the Issuer which in an insolvency or liquidation of the Issuer rank *pari passu* among themselves and with certain other obligations of the Issuer, subordinated to all present and future unsubordinated and subordinated obligations of the Issuer and senior only to the Issuer's share capital and similar present or future instruments. According to the Terms and Conditions, in an insolvency or liquidation of the Issuer, no payments under the Notes will be made to the Noteholders unless the Issuer has discharged or secured in full (i.e., not only with a quota) all claims that rank senior to the Notes.

In a liquidation, insolvency or any other proceeding for the avoidance of insolvency of the Issuer, the Noteholders may recover proportionately less than the holders of the notes of unsubordinated or subordinated obligations of the Issuer or may recover nothing at all. Potential investors should take into consideration that liabilities ranking senior to the Notes may also arise out of events that are not reflected on the Issuer's balance sheet, including, without limitation, the issuance of guarantees or other payment undertakings. Claims of beneficiaries under such guarantees or other payment undertakings will, in liquidation or insolvency proceedings of the Issuer, become unsubordinated or subordinated liabilities and will therefore be paid in full before payments are made to the Noteholders.

Claims under the Subordinated Guarantees are subordinated to senior and subordinated obligations of the Guarantor.

The Guarantor's obligations under the Subordinated Guarantees are unsecured and rank subordinate to all present and future unsubordinated and subordinated obligations of the Guarantor, *pari passu* with present or future parity obligation of the Guarantor and senior only to the Guarantor's share capital and similar present or future instruments. This means that if the Guarantor fails to pay any liability that is senior to the Subordinated Guarantees, it may not make payments on the Subordinated Guarantees. Also, if the Guarantor is bankrupt or liquidates or dissolves, the Guarantor or its trustee will use assets of the Guarantor to pay obligations on all liabilities ranking senior to the Subordinated Guarantees before making payments on the Subordinated Guarantees. Any parity obligations will share equally in payments with the Subordinated Guarantees if the Guarantor does not have sufficient funds to make full payments on all of them.

Interest payments under the Notes may be deferred at the option of the Issuer.

Noteholders should be aware that interest may not be due and payable (*fällig*) on the scheduled Interest Payment Date, and that the payment of the resulting Deferred Interest Payments is subject to certain further conditions. Failure to pay interest as a result of an interest deferral will not constitute a default of the Issuer or a breach of any other obligations under the Notes or for any other purposes. The Noteholders will not receive any additional interest or compensation for the deferral of payment. In particular, the resulting Deferred Interest Payments will not bear interest.

Any deferral of interest payments will likely have an adverse effect on the market price of the Notes. In addition, as a result of the interest deferral provision of the Notes, the market price of the Notes may be more volatile than the market prices of other debt securities on which interest accrues that are not subject to such deferrals and may be more sensitive generally to adverse changes in the Issuer's or the Guarantor's financial condition.

The Noteholders are exposed to risks relating to fixed interest rate notes.

Until the respective First Reset Date of the Notes, each Series of Notes bears interest at a fixed rate for the initial fixed rate period. A Noteholder of a fixed interest rate Note carries the risk that the prices of the Notes can fall as a result of changes in the interest rate on the market. While the nominal interest rate of the Notes is fixed for the entire initial fixed rate period of the Notes and thereafter will be reset every five years to the reference rate plus the relevant margin specified in the relevant Terms and Conditions, the current interest rate on the capital market ("market interest rate") typically changes on a daily basis. As the market interest rate changes, the price of a Note with a fixed interest rate also changes – but in the opposite direction. If the market interest rate increases, the price of a Note with a fixed interest rate typically falls until the yield of such a Note approximately equals the market interest rate. If the market interest rate decreases, the price of a fixed interest rate Note typically increases, until the yield of such Note is approximately equal to the market interest rate. Noteholders should be aware that movements of the market interest rate can adversely affect the market price of the Notes and can lead to losses for Noteholders if they sell their Notes.

In addition, the credit spread of the Issuer, on which the initial fixed interest rate and the margins applicable with regard to the determination of the interest rate for each Reset Period was based, may change. A credit spread is the margin payable by the Issuer to the Noteholders as a premium for the assumed credit risk of the Issuer. Credit spreads are offered and sold as premiums on current risk-free interest rates or as discounts on the price.

Factors influencing the credit spread include, among other things, the creditworthiness and rating of the Issuer, probability of default, recovery rate, remaining term to maturity of obligations under any collateralisation or guarantee and declarations as to any preferred payment or subordination. The liquidity situation, the general level of

interest rates, overall economic developments, and the currency, in which the relevant obligation is denominated may also have a positive or negative effect.

Investors are exposed to the risk that the credit spread of the Issuer widens, resulting in a decrease in the price of the Notes.

Noteholders are exposed to risks relating to the reset of interest rates linked to the 5-year Swap Rate.

Starting with the end of the initial fixed interest rate period, each Series of Notes bears interest at a rate which will be determined on each respective reset date at the 5-year swap rate for the relevant reset period plus a margin.

Investors should be aware that the performance of the 5-year swap rate and the interest income on the Notes cannot be anticipated.

Due to varying interest income, investors are not able to determine a definite yield of the Notes at the time they purchase them, so that their return on investment cannot be compared with that of investments having longer fixed interest periods.

Investors in the Notes should bear in mind that neither the current nor the historical level of the 5-year swap rate is an indication of the future development of such 5-year swap rate.

Furthermore, during each Reset Period, it cannot be ruled out that the price of the Notes may fall as a result of changes in the market interest rate, as the market interest rate fluctuates. During each of these periods, the investor is exposed to the risk as described under "*— Noteholders are exposed to risks relating to fixed interest rate notes*".

Risks associated with the reform of interest rate 'benchmarks'.

Following the respective First Reset Date, interest amounts payable under each Series of Notes are calculated by reference to the annual swap rate for swap transactions denominated in Euro with a term of 5 years, which appears on the Reuters Screen Page ICESWAP2.

This swap-rate, the underlying Euro Interbank Offered Rate ("**EURIBOR**") and other interest rates or other types of rates and indices which are deemed "benchmarks" (each a "**Benchmark**" and together, the "**Benchmarks**") have become the subject of regulatory scrutiny and recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such Benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on the Notes.

International proposals for reform of Benchmarks include the European Council's regulation (EU) 2016/1011 of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "**Benchmark Regulation**") which is fully applicable since 1 January 2018.

The Benchmark Regulation could have a material impact on the Notes, including in any of the following circumstances:

- a rate or index which is a Benchmark may only be used if its administrator obtains authorisation or is registered and in case of an administrator which is based in a non-EU jurisdiction, if the administrator's legal benchmark system is considered equivalent (Article 30 Benchmark Regulation), the administrator is recognised (Article 32 Benchmark Regulation) or the relevant Benchmark is endorsed (Article 33 Benchmark Regulation) (subject to applicable transitional provisions). If this is not the case, Notes linked to such Benchmarks could be impacted; and
- the methodology or other terms of the Benchmark could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could have an impact on the Notes, including determination of the rate by the Issuer, the Calculation Agent or an independent adviser, as the case may be.

In addition to the aforementioned Benchmark Regulation, there are numerous other proposals, initiatives and investigations which may impact Benchmarks.

Following the implementation of any such potential reforms, the manner of administration of Benchmarks may change, with the result that they may perform differently than in the past, or Benchmarks could be eliminated entirely, or there could be other consequences which cannot be predicted.

Any changes to a Benchmark as a result of the Benchmark Regulation or other initiatives, could have a material adverse effect on the costs of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Investors should be aware that any changes to a relevant Benchmark may have a material adverse effect on the value of the Notes.

Under the terms and conditions of the Notes, certain benchmark replacement provisions will apply in case a Benchmark (or any component part thereof) used as a reference for the calculation of interest amounts payable under the Notes were to be discontinued or otherwise unavailable:

If a Benchmark (or any component part thereof) used to calculate interest amounts payable under the Notes for any interest period has ceased to be calculated or administered, the Issuer shall endeavour to appoint an independent adviser, which must be an independent financial institution of international repute or other independent financial adviser experienced in the international capital markets. Such independent adviser will be tasked with determining whether an officially recognised successor rate to the discontinued Benchmark exists. If that is not the case, the independent adviser will attempt to find an alternative rate which, possibly after application of adjustments or spreads, can replace the discontinued Benchmark. If the independent adviser determines a successor rate or alternative rate (the "**New Benchmark Rate**"), such rate will replace the previous Benchmark for purposes of determining the relevant rate of interest. Such determination will be binding for the Issuer, the Calculation Agent, the Paying Agents and the Noteholders of such Series of Notes. Any amendments pursuant to these fall-back provisions will apply with effect from the respective effective date specified in the terms and conditions of the Notes.

If the Issuer fails to appoint an independent adviser or if the adviser fails to determine a New Benchmark Rate following a discontinuation of a relevant Benchmark, the reference rate applicable to the immediately following reset period shall be the original benchmark rate determined on the last preceding interest determination date, provided, however, that, in case of the first reset period, the reference rate shall be the original benchmark rate on the screen page on the last day preceding the interest determination date on which such original benchmark rate was displayed.

The replacement of a Benchmark could have adverse effects on the economic return of the Noteholder of Notes compared to the applicable original benchmark rate.

Noteholders are subject to the risk of a partial or total failure of the Issuer or the Guarantor to make interest and/or redemption payments.

Any person who purchases the Notes is relying on the creditworthiness of the Issuer and the Guarantor and has no rights against any other person. Noteholders are subject to the risk of a partial or total failure of the Issuer or the Guarantor to make interest and/or redemption payments that the Issuer or the Guarantor is obliged to make under the Notes or the Subordinated Guarantees, respectively. The worse the creditworthiness of the Issuer or the Guarantor, the higher the risk of loss (see also "*Risks relating to the Guarantor and the Group*" above). A materialisation of the credit risk may result in partial or total failure of the Issuer or the Guarantor to make interest and/or redemption payments under the Notes or the Subordinated Guarantees, respectively.

In addition, even if the likelihood that the Issuer or the Guarantor will be in a position to fully perform all obligations under the Notes or the Subordinated Guarantees, respectively, when they fall due actually has not decreased, market participants could nevertheless be of that opinion. Market participants may in particular be of such opinion if market participants' assessment of the creditworthiness of corporate debtors in general or debtors operating in the industries sector adversely change. If any of these risks occur, third parties would only be willing to purchase the Notes for a lower price than before the materialisation of said risk. The market value of the Notes may therefore decrease.

The Noteholders have no voting rights.

The Notes are non-voting with respect to general meetings of the Issuer or the Guarantor. Consequently, the Noteholders cannot influence any decisions by the Issuer to defer interest payments or to optionally settle such Deferred Interest Payments or any other decisions concerning the capital structure or any other matters relating to the Issuer or the Guarantor.

The Noteholders have limited rights in German insolvency proceedings.

In an insolvency over the assets of the Issuer or the Guarantor, claims against the Issuer or the Guarantor under the Notes and the Subordinated Guarantees, respectively, would be treated as deeply subordinated insolvency claims (*nachrangige Insolvenzforderungen*). According to section 174 paragraph 3 of the German Insolvency Code, deeply subordinated insolvency claims must not be registered with the insolvency court unless the insolvency court handling the case has granted special permission allowing these deeply subordinated insolvency claims to be filed which is not the rule, but the exception. The Noteholders would not participate in any creditors' committee (*Gläubigerausschuss*) pursuant to German Insolvency Code and would have very limited rights within the creditors' assembly (*Gläubigerversammlung*) pursuant to German Insolvency Code. They may be invited to participate in the creditors' assembly but would not be entitled to vote within such meetings (section 77 paragraph 1 of the German Insolvency Code).

In case of insolvency plan proceedings (*Insolvenzplanverfahren*) the Noteholders generally would have no voting right on the adoption of an insolvency plan presented by the Issuer or the Guarantor, the relevant insolvency administrator or custodian (sections 237 and 246 of the German Insolvency Code). In addition, their claims would be waived after the adoption of the insolvency plan unless the insolvency plan makes an exception to this general rule (section 225 paragraph 1 German Insolvency Code).

The Notes do not include express events of default or a cross default.

The Noteholders should be aware that the Terms and Conditions of the Notes do not contain any express event of default provisions. There will also not be any cross default under the Notes.

The Notes do not contain any financial covenants.

Neither the Guarantor nor any of its subsidiaries (including the Issuer) will be restricted from incurring additional unsecured debt or other liabilities, including debt ranking senior or equal to the obligations under or in connection with the Notes or the Subordinated Guarantees.

If the Issuer or the Guarantor incurs additional debt or liabilities, the Issuer's and/or the Guarantor's ability to pay their respective obligations under the Notes and the Subordinated Guarantees, respectively, could be adversely affected. Such issuance of further debt could further reduce the amount recoverable by the Noteholders upon insolvency or liquidation of the Issuer or the Guarantor or may increase the likelihood that the Issuer is required or permitted to defer payments of interest under the Notes.

Noteholders will not be protected under the terms of the Notes in the event of a highly leveraged transaction, a reorganization or a restructuring, merger or similar transaction that may adversely affect Noteholders.

The Notes may be called and redeemed at the option of the Issuer on certain dates and at any time upon the occurrence of certain events. If the Notes are so redeemed, Noteholders are exposed to the risk of a lower yield than expected.

The Issuer may redeem the NC5.5 Notes during the period from and including 22 January 2025 to and including the NC5.5 First Reset Date or on any Interest Payment Date of the NC5.5 Notes thereafter.

The Issuer may redeem the NC10 Notes during the period from and including 18 July 2029 to and including the NC10 First Reset Date or on any Interest Payment Date of the NC10 Notes thereafter.

The Issuer may further redeem all outstanding Notes of each Series at any time upon occurrence of a (i) Gross-up Event, (ii) a Tax Event, (iii) an Accounting Event or (iv) a Rating Agency Event or (v) in case of minimal outstanding aggregate principal amount (all as defined and further described in the Terms and Conditions).

Noteholders are exposed to the risk that due to such redemption their investment will have a lower than expected yield. In such circumstances, the investor might not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the Notes.

Risk of change in market value.

The market value of the Notes is influenced by a change in the creditworthiness (or the perception thereof) of the Guarantor and by the credit rating of the Guarantor and a number of other factors including, but not limited to, market interest and rate of return and certain market expectations with regard to the Issuer making use of a right to call the Notes for redemption.

The value of the Notes depends on a number of interacting factors, including, but not limited to, economic and political events in Germany or elsewhere, factors affecting the capital markets in general and the stock exchanges on which the Notes are traded. The price at which a Noteholder can sell the Notes might be considerably below the issue price or the purchase price paid by such Noteholder.

There is no active public trading market for the Notes.

There is currently no secondary market for the Notes.

Application has been made to the Luxembourg Stock Exchange to list each Series of Notes on the Official List of the Luxembourg Stock Exchange and for admission to trading of the Notes on the Euro MTF Market operated by the Luxembourg Stock Exchange, which is a multilateral trading facility for the purposes of MiFID II, and, therefore, not an EU-regulated market.

There can, however, be no assurance regarding the future development of a liquid secondary market for the Notes or the ability of Noteholders to sell their Notes or the price at which Noteholders may be able to sell their Notes. If such a market were to develop, the Notes could trade at prices that may be higher or lower than the initial offering price depending on many factors, including prevailing interest rates, the Guarantor's operating results, the market for similar securities and other factors, including general economic conditions, performance and prospects, as well as recommendations of securities analysts. The liquidity of, and the trading market for, the Notes may also be adversely affected by declines in the market for debt securities generally. Such a decline may affect any liquidity and trading of the Notes independent of the Guarantor's financial performance and prospects. In an illiquid market, an investor might not be able to sell the Notes at any time at fair market prices. The possibility to sell the Notes might additionally be restricted by country specific reasons.

Risk of change in rating.

Ratings assigned to the Guarantor by certain independent rating agencies are an indicator of the Guarantor's ability to meet its obligations in a timely manner. The lower the assigned rating is on the respective scale the higher the respective rating agency assesses the risk that obligations will not be met at all or not be met in a timely manner. The market value of the Notes from time to time is likely to depend upon the level of credit rating assigned to the long-term debt of the Guarantor. Rating agencies may change, suspend or withdraw their ratings at short notice. A rating's change, suspension or withdrawal may affect the price and the market value of the outstanding Notes. An investor may thus incur financial disadvantages as he may not be able to sell the Notes at a fair price. The Notes are expected to be assigned a credit rating by S&P Global Ratings Europe Limited ("Standard & Poor's") and by Moody's Investors Services Limited ("Moody's"). The ratings may not reflect the potential impact of all risks related to the structure, market and additional factors discussed herein, and other factors that may affect the value of the Notes. In addition, Standard & Poor's, Moody's or any other rating agency may change its methodologies for rating securities with features similar to the Notes in the future. This may include the relationship between ratings assigned to an issuer's senior securities and ratings assigned to securities with features similar to the Notes, sometimes called "notching". If the rating agencies were to change their practices for rating such securities in the future and the ratings of the Notes were to be subsequently lowered, this may have a negative impact on the trading price of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

An investment in the Notes may be subject to the risk of inflation.

The inflation risk is the risk of future money depreciation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on the Notes. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.

There may be transaction costs and/or charges in connection with the purchase or sale of the Notes.

When the Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) are incurred in addition to the purchase or sale price of the Notes. Credit institutions as a rule charge commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Noteholders may also be charged for the brokerage fees, commissions and other fees and expenses of such parties (third party costs). These incidental costs may significantly reduce or eliminate any profit from holding the Notes.

The income under the Notes may be reduced by taxes.

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or other documentary charges or duties in accordance with the laws and practices of the country where the Notes are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for financial instruments such as the Notes. Potential investors are advised to ask for their own tax adviser's advice on their individual taxation with respect to the acquisition, sale and redemption of the Notes. Only these advisors are in a position to duly consider the specific situation of the potential investor.

No assurance can be given as to the impact of any possible judicial decision or change of laws or administrative practices after the date of this Prospectus.

The Terms and Conditions of the Notes are based on German law in effect as at the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to German law or administrative practice or the official application or interpretation of German law after the date of this Prospectus.

A potential investor may not rely on the Issuer, the Guarantor, the Joint Bookrunners or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the Notes.

Each potential investor in the Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes is fully consistent with its (or if it is acquiring the Notes in a fiduciary capacity, the beneficiary's) financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it (whether acquiring the Notes as principal or in a fiduciary capacity) and is a fit, proper and suitable investment for it (or if it is acquiring the Notes in a fiduciary capacity, for the beneficiary), notwithstanding the clear and substantial risks inherent in investing in or holding the Notes.

A potential investor may not rely on the Issuer, the Guarantor, the Joint Bookrunners or any of their respective affiliates in connection with its determination as to the legality of its acquisition of the Notes or as to the other matters referred to above.

Without independent review and advice, an investor may not adequately understand the risks inherent with an investment in the Notes and may lose parts or all of its capital invested without taking such or other risks into consideration before investing in the Notes.

Because the Global Notes are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer.

Each Series of Notes will be represented by one or more Global Notes. Such Global Notes will be deposited with a common depositary for Euroclear and Clearstream, Luxembourg. Investors will not be entitled to receive definitive notes. Euroclear and Clearstream, Luxembourg will maintain records of the beneficial interests in the Global Notes. While the Notes are represented by one or more Global Notes, investors will be able to trade their beneficial interests only through Euroclear and Clearstream, Luxembourg and the Issuer will discharge its payment obligations under the Notes by making payments to the common depositary for Euroclear and Clearstream, Luxembourg for distribution to their account holders. A holder of a beneficial interest in the Global Notes must rely on the procedures of Euroclear and Clearstream, Luxembourg to receive payments under the Notes. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of beneficial interests in, the Global Notes.

Certain rights of the Noteholders under the Terms and Conditions may be amended or reduced or even cancelled by Noteholders' resolutions and any such resolutions will be binding for all Noteholders of the respective Series of Notes. Any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the respective Series of Notes outstanding.

Since the Terms and Conditions of each Series of Notes provide for meetings of Noteholders of the respective Series of Notes or the taking of votes without a meeting, the Terms and Conditions of such Series of Notes may be amended by majority resolution of the Noteholders of such Series of Notes and a Noteholder is subject to the risk of being outvoted by a majority resolution of the Noteholders of the respective Series of Notes. The rules pertaining to resolutions of Noteholders are set out in the German Act on Debt Securities of 2009 (*Schuldverschreibungsgesetz – "SchVG"*) and are for the most part mandatory. According to the SchVG the relevant majority for Noteholder resolutions is generally based on votes cast, rather than on the aggregate principal amount of the relevant Notes outstanding, therefore, any such resolution may effectively be passed with the consent of less than a majority of the aggregate principal amount of the respective Series of Notes outstanding. As such majority resolution is binding on all Noteholders of the respective Series of Notes, certain rights of such Noteholders against the Issuer under the Terms and Conditions of such Series of Notes may be amended or reduced or even cancelled.

If a Noteholders' representative will be appointed for the respective Series of Notes the Noteholders of the respective Series of Notes may be deprived of their individual right to pursue and enforce their rights under the respective Terms and Conditions against the Issuer.

Since the Terms and Conditions of each Series of Notes provide that the Noteholders of the respective Series of Notes are entitled to appoint a Noteholders' Representative by a majority resolution of such Noteholders, it is possible that a Noteholder may be deprived of its individual right to pursue and enforce its rights under the Terms and Conditions of such Series of Notes against the Issuer, such right passing to the Noteholders' Representative who is then exclusively responsible to claim and enforce the rights of all the Noteholders of the relevant Series of Notes.

Exchange rate risks and exchange controls.

The Notes are denominated in Euro. Potential investors should bear in mind that an investment in the Notes involves currency risks. This presents certain risks relating to currency conversions if a Noteholder's financial activities are denominated principally in a currency or currency unit (the investor's currency) other than Euro. These include the risk that exchange rates may change significantly (including changes due to devaluation of the Euro or revaluation of the investor's currency) and the risk that authorities with jurisdiction over the investor's currency may impose or modify exchange controls. An appreciation in the value of the investor's currency relative to the Euro would decrease (i) the investor's currency-equivalent yield on the Notes, (ii) the investor's currency equivalent value of the principal payable on the Notes and (iii) the investor's currency-equivalent market value of the Notes.

In addition, government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable currency exchange rate. As a result, Noteholders may receive less interest or principal than expected, or no interest or principal.

USE OF PROCEEDS

In connection with the issue of the Notes, the Issuer will receive net proceeds of approximately EUR 1,992,000,000. The Issuer intends to use the net proceeds from the issuance of the Notes for general corporate purposes of Deutsche Bahn.

Determination of the Reference Rate. The Calculation Agent will determine the relevant Reference Rate in accordance with this § 3(4) on each Interest Determination Date.

The "Reference Rate" for a Reset Period will be determined by the Calculation Agent on the relevant Interest Determination Date (as defined below) prior to the Reset Date on which the relevant Reset Period commences (the "Reference Reset Date") and will be,

- (a) as long as no Benchmark Event has occurred,

If the Reference Bank Rate cannot be determined pursuant to the definition of this term, but no Benchmark Event has occurred, the relevant "Reference Rate" shall be equal to the last Original Benchmark Rate available on the Screen Page as determined by the Calculation Agent; and

Der "**Referenzbankensatz**" ist der Prozentsatz, der auf Basis der 5-Jahres-Mid-Swapsatz-Quotierungen, die der Berechnungsstelle auf Bitten der Emittentin ungefähr um 11:00 Uhr (Frankfurter Zeit) von bis zu fünf führenden von der Emittentin ausgewählten Swap-Händlern im Interbankenhandel (die "**Reset-Referenzbanken**") gestellt werden, am Zinsfeststellungstag von der Berechnungsstelle festgelegt wird. Wenn mindestens drei 5-Jahres-Mid-Swapsatz-Quotierungen genannt werden, wird der Referenzbankensatz das arithmetische Mittel der 5-Jahres-Mid-Swapsatz-Quotierungen unter Ausschluss der höchsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der höchsten Quotierungen) und der niedrigsten Quotierung (bzw., für den Fall von gleich hohen Quotierungen, einer der niedrigsten Quotierungen) sein. Falls nur zwei 5-Jahres-Mid-Swapsatz-Quotierungen zur Verfügung gestellt werden, ist der Referenzbankensatz das rechnerische Mittel der zur Verfügung gestellten Quotierungen. Falls nur eine 5-Jahres-Mid-Swapsatz-Quotierung zur Verfügung gestellt wird, ist der Referenzbankensatz gleich der zur Verfügung gestellten Quotierung. Dabei bezeichnet "**5-Jahres-Mid-Swapsatz-Quotierungen**" das arithmetische Mittel der nachgefragten (*bid*) und angebotenen (*offered*) Prozentsätze für den jährlichen Festzinszahlungsstrom (berechnet auf einer 30/360 Tage-Berechnungsbasis) einer fixed-for-floating Euro Zinsswap-Transaktion, (x) die eine 5-jährige Laufzeit hat und am betreffenden Reset-Termin beginnt, (y) die auf einen Betrag lautet, der dem einer repräsentativen einzelnen Transaktion in dem relevanten Markt zur relevanten Zeit eines anerkannten Händlers mit guter Bonität im Swap-Markt entspricht, und (z) deren variabler Zahlungsstrom auf dem 6-Monats EURIBOR Satz beruht (berechnet auf einer Actual/360 Tage-Berechnungsbasis).

If at least three 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations, eliminating the highest quotation (or, in the event of equality one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest). If only two 5-year Mid Swap Rate Quotations are provided, the Reference Bank Rate will be the arithmetic mean of the quotations provided. If only one 5-year Mid Swap Rate Quotation is provided, the Reference Bank Rate will be the quotation provided. § 10 ERSETZUNG

(1) *Ersetzung.* Die Emittentin ist jederzeit berechtigt, sofern sie sich nicht mit einer Zahlung von Kapital oder Zinsen auf die Schuldverschreibungen in Verzug befindet, ohne Zustimmung der Anleihegläubiger entweder die Garantin oder eine Tochtergesellschaft (wie nachstehend definiert) der Garantin an ihrer Stelle als Hauptschuldnerin (die "**Nachfolgeschuldnerin**") für alle

Die Mehrheitsbeschlüsse der Anleihegläubiger sind für alle Anleihegläubiger gleichermaßen verbindlich. Ein Mehrheitsbeschluss der Anleihegläubiger, der nicht gleiche Bedingungen für alle Anleihegläubiger vorsieht, ist unwirksam, es sei denn die benachteiligten Anleihegläubiger stimmen ihrer Benachteiligung ausdrücklich zu.

Majority resolutions of the Noteholders shall be binding on all Noteholders alike. § 15 SPRACHE

§ 15 LANGUAGE

These Terms and Conditions are written in the German language and provided with an English language translation. The German text will be the only legally binding version. The English language translation is provided for convenience only.

Restrictions regarding the Redemption and Repurchase of the Notes

The following paragraphs in italics do not form part of the Terms and Conditions.

The Issuer and the Guarantor intend (without thereby assuming any legal or contractual obligation) to redeem or repurchase the Notes only to the extent they are replaced with instruments with equivalent S&P equity credit. The net proceeds which are received by the Guarantor or a Subsidiary of the Guarantor from the sale of securities to third parties and are assigned an S&P equity credit that is at least equal to the S&P equity credit assigned to the Notes to be redeemed or repurchased on the issue date of the Notes (but taking into account any changes in hybrid capital methodology or the interpretation thereof since the issue date of the Notes).

The following exceptions apply as to the Issuer's and the Guarantor's replacement intention. The Notes are not required to be replaced:

- (i) *if the rating assigned by S&P to the Guarantor is at least AA or the stand-alone credit profile assigned by Standard & Poor's to the Guarantor is at least a- (or such similar nomenclatures then used by S&P) and the Issuer is comfortable that such rating would not fall below this level as a result of such redemption or repurchase, or*
- (ii) *in the case of repurchase of the Notes in accordance with § 6(2) taken together with other repurchases of hybrid securities of the Issuer (as the case may be) which are less than (x) 10 per cent. of the aggregate principal amount of the outstanding hybrid securities of the Guarantor and any Subsidiaries of the Guarantor in any period of 12 consecutive months or (y) 25 per cent. of the aggregate principal amount of the outstanding hybrid securities of the Guarantor and any Subsidiaries of the Guarantor in any period of 10 consecutive years provided that in each case such repurchase has no materially negative effect on the Guarantor's credit profile, or*

- (iii) if the Notes are redeemed following a Gross-up Event, a Tax Event, an Accounting Event or a Rating Agency Event or in case of minimal outstanding aggregate principal amount, or
- (iv) if the Notes are not assigned any category (not even minimal, except where minimal results due to effective remaining maturity) of "equity credit" (or such similar nomenclature then used by S&P at the time of such redemption or repurchase), or
- (v) if such redemption or repurchase occurs on or after 22 April 2045

The replacement intention of the Issuer and the Guarantor, including during the period of five years following the Interest Commencement Date, shall not apply for repurchases of Notes with an aggregate amount up to the S&P Excess Amount. "S&P Excess Amount" means the aggregate principal amount of outstanding hybrid capital of the Guarantor and any Subsidiaries of the Guarantor exceeding the maximum aggregate principal amount of hybrid capital for which S&P under its then prevailing methodology would recognize equity credit from time to time based on the Guarantor's adjusted total capitalization.

Terms used but not defined in the paragraphs above shall have the meaning set out in the Terms and Conditions.

- (3) *Vorläufige Globalurkunde – Austausch.*
 - (a) Die Schuldverschreibungen sind anfänglich durch eine vorläufige Globalurkunde (die "**vorläufige Globalurkunde**") ohne Zinsscheine verbrieft. Die vorläufige Globalurkunde wird gegen Schuldverschreibungen in ihrem Nennbetrag, die durch eine Dauerglobalurkunde (die "**Dauerglobalurkunde**") ohne Zinsscheine verbrieft sind, ausgetauscht. Die vorläufige Globalurkunde und die Dauerglobalurkunde (jeweils eine "**Globalurkunde**" und zusammen die "**Globalurkunden**") werden jeweils von oder im Namen der Emittentin unterschrieben und werden von oder im Namen der Hauptzahlstelle mit einer Kontrollunterschrift versehen. Einzelurkunden und Zinsscheine werden nicht ausgegeben.

TERMS AND CONDITIONS

These Terms and Conditions are written in the German language and provided with an English language translation. The German text will be the only legally binding version. The English language translation is provided for convenience only.

§ 1 FORM AND DENOMINATION

- (1) *Currency, Denomination.* Deutsche Bahn Finance GmbH (the "**Issuer**") issues guaranteed undated subordinated, resettable, fixed rate bearer notes (the "**Notes**") in a denomination of EUR 100,000 each (the "**Principal Amount**") in the aggregate principal amount of Euro 1,000,000,000 (in words: Euro one billion).
- (2) *Form.* The Notes are being issued in bearer form.
- (3) *Temporary Global Note – Exchange.*
 - (a) The Notes are initially represented by a temporary global note (the "**Temporary Global Note**") without coupons. The Temporary Global Note will be exchanged for Notes in the Principal Amount represented by a permanent global note (the "**Permanent Global Note**") without coupons. The Temporary Global Note and the Permanent Global Note (each a "**Global Note**" and together the "**Global Notes**") will each be signed by or on behalf of the Issuer and will each be authenticated by or on behalf of the Principal Paying Agent. Definitive Notes and coupons will not be issued.

- (b) Die vorläufige Globalurkunde wird an einem Tag (der "**Austauschtag**") gegen die Dauerglobalurkunde ausgetauscht, der nicht mehr als 180 Tage nach dem Tag der Ausgabe der vorläufigen Globalurkunde liegt. Der Austauschtag darf nicht weniger als 40 Tage nach dem Tag der Begebung liegen. Ein solcher Austausch soll nur nach Vorlage von Bescheinigungen erfolgen, wonach der oder die wirtschaftlichen Eigentümer der durch die vorläufige Globalurkunde verbrieften Schuldverschreibungen keine US-Personen sind (ausgenommen bestimmte Finanzinstitute oder bestimmte Personen, die Schuldverschreibungen über solche Finanzinstitute halten). Zinszahlungen auf durch eine vorläufige Globalurkunde verbrieft Schuldverschreibungen erfolgen erst nach Vorlage solcher Bescheinigungen. Eine gesonderte Bescheinigung ist hinsichtlich einer jeden solchen Zinszahlung erforderlich. Jede Bescheinigung, die am oder nach dem 40. Tag nach dem Tag der Ausgabe der vorläufigen Globalurkunde eingeht, wird als ein Ersuchen behandelt werden, diese vorläufige Globalurkunde gemäß diesem § 1(3)(b) auszutauschen. Wertpapiere, die im Austausch für die vorläufige Globalurkunde geliefert werden, sind nur außerhalb der Vereinigten Staaten (wie in § 8 definiert) zu liefern.
- (4) *Clearingsystem.* Jede die Schuldverschreibungen verbrieffende Globalurkunde wird von dem oder im Namen des Clearingsystems verwahrt.
- (b) The Temporary Global Note will be exchanged for the Permanent Global Note on a date (the "**Exchange Date**") not later than 180 days after the date of issue of the Temporary Global Note. The Exchange Date must not be earlier than 40 days after the date of issue. Such exchange shall only be made upon delivery of certifications to the effect that the beneficial owner or owners of the Notes represented by the Temporary Global Note is/are not (a) U.S. person or persons (other than certain financial institutions or certain persons holding Notes through such financial institutions). Payments of interest on Notes represented by a Temporary Global Note will be made only after delivery of such certifications. A separate certification shall be required in respect of each such payment of interest. Any such certification received on or after the 40th day after the date of issue of the Temporary Global Note will be treated as a request to exchange the Temporary Global Note pursuant to this § 1(3)(b). Any securities delivered in exchange for the Temporary Global Note shall be delivered only outside of the United States (as defined in § 8).

- (4) *Clearingsystem.* Jede die Schuldverschreibungen verbrieffende Globalurkunde wird von dem oder im Namen des Clearingsystems verwahrt.

"Clearingsystem" bedeutet jeweils Folgendes: Clearstream Banking S.A., Luxemburg ("CBL") Euroclear Bank SA/NV, Brüssel ("Euroclear") (CBL und Euroclear jeweils ein internationaler Zentralverwahrer von Wertpapieren (*international central securities depositary*) ("ICSD" und zusammen die "ICSDs")).

- (4) *Clearing System.* Each Global Note representing the Notes will be kept in custody by or on behalf of the Clearing System.

"Clearing System" means Clearstream Banking S.A., Luxembourg ("CBL") and Euroclear Bank SA/NV, Brussels ("Euroclear") (CBL and Euroclear each an international central securities depositary ("ICSD" and together the "ICSDs")).

Die Schuldverschreibungen werden in Form einer New Global Note ("NGN") ausgegeben und von einem gemeinsamen Wertpapierverwahrer (*common safekeeper*) im Namen beider ICSDs verwahrt.

Der Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen entspricht dem jeweils in den Registern beider ICSDs eingetragenen Gesamtbetrag. Die Register der ICSDs (unter denen man die Register versteht, die jeder ICSD für seine Kunden über den Betrag ihres Anteils an den Schuldverschreibungen führt) sind schlüssiger Nachweis über den Gesamtnennbetrag der durch die Globalurkunde verbrieften Schuldverschreibungen, und eine zu diesen Zwecken von einem ICSD jeweils ausgestellte Bestätigung mit dem Nennbetrag der so verbrieften Schuldverschreibungen ist ein schlüssiger Nachweis über den Inhalt des Registers des jeweiligen ICSD zu diesem Zeitpunkt.

Bei Rückzahlung oder einer Zinszahlung bezüglich der durch die Globalurkunde verbrieften Schuldverschreibungen bzw. bei Kauf und Entwertung der durch die Globalurkunde verbrieften Schuldverschreibungen stellt die Emittentin sicher, dass die Einzelheiten über Rückzahlung, Zahlung bzw. Kauf und Entwertung bezüglich der Globalurkunde *pro rata* in die Register der ICSDs eingetragen werden und dass nach dieser Eintragung vom Gesamtnennbetrag der in die Register der ICSDs aufgenommenen und durch die Globalurkunde verbrieften Schuldverschreibungen der Gesamtnennbetrag der zurückgezahlten bzw. gekauften und entwerteten Schuldverschreibungen abgezogen wird.

Bei Austausch eines Anteils von ausschließlich durch eine vorläufige Globalurkunde verbrieften Schuldverschreibungen wird die Emittentin sicherstellen, dass die Einzelheiten dieses Austauschs *pro rata* in die Aufzeichnungen der ICSDs aufgenommen werden.

Ein "Steuerereignis" liegt vor, wenn am oder nach dem Tag der Begebung der Schuldverschreibungen der Emittentin oder der Garantin ein Gutachten einer anerkannten Anwaltskanzlei vorliegt (und die Emittentin oder die Garantin der Zahlstelle eine Kopie davon gibt), aus dem hervorgeht, dass aufgrund einer Gesetzesänderung (oder einer Änderung von darunter erlassenen Bestimmungen und Vorschriften) der Bundesrepublik Deutschland oder einer ihrer Gebietskörperschaften oder Steuerbehörden, oder als Folge einer Änderung der offiziellen Auslegung oder Anwendung solcher Gesetze, Bestimmungen oder Vorschriften durch eine gesetzgebende Körperschaft, ein Gericht, eine Regierungsstelle oder eine Aufsichtsbehörde (einschließlich des Erlasses von Gesetzen sowie der Bekanntmachung gerichtlicher oder aufsichtsrechtlicher Entscheidungen), Zinsen, die von der Emittentin oder der Garantin auf die Schuldverschreibungen zu zahlen sind, von der Emittentin oder der Garantin nicht mehr für die Zwecke der deutschen Körperschaftsteuer voll abzugfähig sind und die Emittentin oder die Garantin dieses Risiko nicht abwenden kann, indem sie zumutbare Maßnahmen ergreift, die sie nach Treu und Glauben für angemessen hält.

Die Bekanntmachung der Rückzahlung nach Eintritt eines Rechnungslegungssereignisses darf nicht früher als 90 Tage vor dem ersten Tag des Berichtszeitraums erfolgen, in dem die betreffende Änderung der Rechnungslegungsgrundsätze, die das Rechnungslegungssereignis ausgelöst hat, in den konsolidierten Abschlüssen der Garantin für diesen Berichtszeitraum umzusetzen ist.

A "Tax Event" will occur if on or after the date of issue of the Notes an opinion of a recognised law firm has been delivered to the Issuer or the Guarantor (and the Issuer or the Guarantor has provided the Paying Agent with a copy thereof) stating that, as a result of any amendment to, or change in, the laws (or any rules or regulations thereunder) of the Federal Republic of Germany or any of its political subdivisions or taxing authorities, or as a result of any amendment to, or change in, an official interpretation or application of any such laws, rules or regulations by any legislative body, court, governmental agency or regulatory authority (including the enactment of any legislation and the publication of any judicial decision or regulatory determination), interest payable by the Issuer or the Guarantor in respect of the Notes is no longer fully deductible by the Issuer or the Guarantor for German corporate income tax purposes, and that risk cannot be avoided by the Issuer or the Guarantor taking such reasonable measures as it (acting in good faith) deems appropriate.

No such notice of redemption following the occurrence of an Accounting Event may be given earlier than 90 days prior to the first day of the accounting period in which the relevant change in accounting principles that caused the occurrence of the Accounting Event is given effect in the consolidated financial statements of the Guarantor for such accounting period.

§ 11 WEITERE EMISSIONEN

Die Emittentin kann ohne Zustimmung der Anleihegläubiger weitere Schuldverschreibungen begeben, die in jeder Hinsicht (mit Ausnahme der ersten Zinszahlung) die gleichen Bedingungen wie die Schuldverschreibungen dieser Anleihe haben und die zusammen mit den Schuldverschreibungen dieser Anleihe eine einzige Anleihe bilden.

The Issuer may from time to time, without the consent of the Noteholders, create and issue further Notes of the series having the same terms and conditions as the Notes in all respects (except for the first payment of interest) so as to form a single series with the Notes of the series.

§ 12
ÄNDERUNG DER BEDINGUNGEN,
GEMEINSAMER VERTRETER

- (1) **Änderung der Anleihebedingungen.** Die Anleihegläubiger können gemäß den Bestimmungen des Gesetzes über Schuldverschreibungen aus Gesamtemissionen (*Schuldverschreibungsgesetz*; "SchVG") durch einen Beschluss mit der in § 12(2) bestimmten Mehrheit über einen im SchVG zugelassenen Gegenstand eine Änderung dieser Anleihebedingungen mit der Emittentin vereinbaren. Die Mehrheitsbeschlüsse der Anleihegläubiger sind für alle Anleihegläubiger gleichermaßen verbindlich. Ein Mehrheitsbeschluss der Anleihegläubiger, der nicht gleiche Bedingungen für alle Anleihegläubiger vorsieht, ist unwirksam, es sei denn die benachteiligten Anleihegläubiger stimmen ihrer Benachteiligung ausdrücklich zu.
- (2) **Mehrheitserfordernisse.** Die Anleihegläubiger entscheiden mit einer Mehrheit von mindestens 75 % (qualifizierte Mehrheit) der an der Abstimmung teilnehmenden Stimmrechte über wesentliche Änderungen der Anleihebedingungen, insbesondere über die in § 5 Absatz 3 des SchVG aufgeführten Maßnahmen. Beschlüsse, durch welche der wesentliche Inhalt der Anleihebedingungen nicht geändert wird, bedürfen zu ihrer Wirksamkeit einer einfachen Mehrheit der an der Abstimmung teilnehmenden Stimmrechte.
- (3) **Abstimmung ohne Versammlung.** Alle Abstimmungen werden ausschließlich im Wege einer Abstimmung ohne Versammlung durchgeführt. Eine Anleihegläubigerversammlung und eine Übernahme der Kosten für eine solche Versammlung durch die Emittentin finden ausschließlich im Fall des § 18 Absatz 4 Satz 2 SchVG statt.
- (4) **Leitung der Abstimmung.** Die Abstimmung wird von einem von der Emittentin beauftragten Notar oder, falls der gemeinsame Vertreter zur Abstimmung aufgefordert hat, vom gemeinsamen Vertreter geleitet.

§ 12
AMENDMENT OF THE CONDITIONS;
NOTEHOLDERS' REPRESENTATIVE

- (1) *Amendment of the Terms and Conditions.* In accordance with the German Act on Debt Securities (*Gesetz über Schuldverschreibungen aus Gesamtemissionen*; "SchVG") the Noteholders may agree with the Issuer on amendments of these Terms and Conditions with regard to matters permitted by the SchVG by resolution with the majority specified in § 12(2). Majority resolutions of the Noteholders shall be binding on all Noteholders alike. A majority resolution of the Noteholders which does not provide for identical conditions for all Noteholders is void, unless Noteholders who are disadvantaged have expressly consented to their being treated disadvantageously.
- (2) *Majority Requirements.* Resolutions relating to material amendments of the Terms and Conditions, in particular consents to the measures set out in § 5(3) of the SchVG, shall be passed by a majority of not less than 75 per cent. (qualified majority) of the votes cast. Resolutions relating to amendments of the Terms and Conditions which are not material require a simple majority of the votes cast.
- (3) *Vote without a Meeting.* All votes will be taken exclusively by vote taken without a meeting. A meeting of Noteholders and the assumption of the costs of such meeting by the Issuer will only take place in the circumstances of § 18(4) sentence 2 of the SchVG.
- (4) *Chair of the Vote.* The vote will be chaired by a notary appointed by the Issuer or, if the Noteholders' Representative has requested the vote, by the Noteholders' Representative.

- (5) *Stimmrecht.* Jeder Anleihegläubiger nimmt an Abstimmungen nach Maßgabe des Nennbetrags oder des rechnerischen Anteils seiner Berechtigung an den ausstehenden Schuldverschreibungen teil.
- (6) *Gemeinsamer Vertreter.*
- (a) Die Anleihegläubiger können durch Mehrheitsbeschluss zur Wahrnehmung ihrer Rechte einen gemeinsamen Vertreter (der "**gemeinsame Vertreter**") für alle Anleihegläubiger bestellen.
 - (b) Der gemeinsame Vertreter hat die Aufgaben und Befugnisse, die ihm durch Gesetz oder von den Anleihegläubigern durch Mehrheitsbeschluss eingeräumt wurden. Er hat die Weisungen der Anleihegläubiger zu befolgen. Soweit er zur Geltendmachung von Rechten der Anleihegläubiger ermächtigt ist, sind die einzelnen Anleihegläubiger zur selbständigen Geltendmachung dieser Rechte nicht befugt, es sei denn, der Mehrheitsbeschluss sieht dies ausdrücklich vor. Über seine Tätigkeit hat der gemeinsame Vertreter den Anleihegläubigern zu berichten. Für die Abberufung und die sonstigen Rechte und Pflichten des gemeinsamen Vertreters gelten die Vorschriften des SchVG.
- (7) *Garantie.* Die oben aufgeführten auf die Schuldverschreibungen anwendbaren Bestimmungen gelten entsprechend für die Bestimmungen der Garantie und einer etwaigen Garantie gemäß § 10(1)(d).
- (5) *Voting Rights.* Each Noteholder participating in any vote shall cast its vote in accordance with the principal amount or the notional share of its interest in the outstanding Notes.
- (6) *Noteholders' Representative.*
- (a) The Noteholders may by majority resolution appoint a common representative (the "**Noteholders' Representative**") to exercise the Noteholders' rights on behalf of each Noteholder.
 - (b) The Noteholders' Representative shall have the duties and powers stipulated by law or granted by majority resolution of the Noteholders. The Noteholders' Representative shall comply with the instructions of the Noteholders. To the extent that the Noteholders' Representative has been authorised to assert certain rights of the Noteholders, the Noteholders shall not be entitled to assert such rights themselves, unless explicitly provided for in the relevant majority resolution. The Noteholders' Representative shall provide reports to the Noteholders on its activities. The provisions of the SchVG apply with regard to the dismissal and the other rights and obligations of the Noteholders' Representative.
- (7) *Guarantee.* The provisions set out above applicable to the Notes will apply mutatis mutandis to the Guarantee and to any guarantee granted pursuant to § 10(1)(d).

§ 13 (Bekanntmachungen)

- (1) Alle Bekanntmachungen, die die Schuldverschreibungen betreffen, außer den in § 12 vorgesehenen Bekanntmachungen, die ausschließlich gemäß den Bestimmungen des Gesetzes über Schuldverschreibungen aus Gesamtemissionen ("SchVG") erfolgen, sind von der Emittentin im Bundesanzeiger zu veröffentlichen. Jede derartige Mitteilung gilt am siebten Tag nach dem Tag der Übermittlung der Mitteilung an das Clearingsystem als wirksam erfolgt.

§ 14 SCHLUSSBESTIMMUNGEN

(3) *Enforcement of Rights.* Any Noteholder may in any proceedings against the Issuer or to which the Noteholder and the Issuer are parties protect and enforce in its own name its rights arising under its Notes on the basis of:

- (a) a certificate issued by its Custodian
 - (i) stating the full name and address of the Noteholder,
 - (ii) specifying an aggregate principal amount of Notes credited on the date of such statement to such Noteholder's securities account(s) maintained with its Custodian and
 - (iii) confirming that its Custodian has given a written notice to the Clearing System and the Principal Paying Agent containing the information specified in (i) and (ii) and bearing acknowledgements of the Clearing System and the relevant account holder in the Clearing System and

§ 15 LANGUAGE

These Terms and Conditions are written in the German language and provided with an English language translation. The German text will be the only legally binding version. The English language translation is provided for convenience only.

Restrictions regarding the Redemption and Repurchase of the Notes

The following paragraphs in italics do not form part of the Terms and Conditions.

The Issuer and the Guarantor intend (without thereby assuming any legal or contractual obligation) to redeem or repurchase the Notes only to the extent they are replaced with instruments with equivalent S&P equity credit. The net proceeds which are received by the Guarantor or a Subsidiary of the Guarantor from the sale of securities to third parties and are assigned an S&P equity credit that is at least equal to the S&P equity credit assigned to the Notes to be redeemed or repurchased on the issue date of the Notes (but taking into account any changes in hybrid capital methodology or the interpretation thereof since the issue date of the Notes).

The following exceptions apply as to the Issuer's and the Guarantor's replacement intention. The Notes are not required to be replaced:

- (i) *if the rating assigned by S&P to the Guarantor is at least AA or the stand-alone credit profile assigned by Standard & Poor's to the Guarantor is at least a- (or such similar nomenclatures then used by S&P) and the Issuer is comfortable that such rating would not fall below this level as a result of such redemption or repurchase, or*
- (ii) *in the case of repurchase of the Notes in accordance with § 6(2) taken together with other repurchases of hybrid securities of the Issuer (as the case may be) which are less than (x) 10 per cent. of the aggregate principal amount of the outstanding hybrid securities of the Guarantor and any Subsidiaries of the Guarantor in any period of 12 consecutive months or (y) 25 per cent. of the aggregate principal amount of the outstanding hybrid securities of the Guarantor and any Subsidiaries of the Guarantor in any period of 10 consecutive years provided that in each case such repurchase has no materially negative effect on the Guarantor's credit profile, or*
- (iii) *if the Notes are redeemed following a Gross-up Event, a Tax Event, an Accounting Event or a Rating Agency Event or in case of minimal outstanding aggregate principal amount, or*
- (iv) *if the Notes are not assigned any category (not even minimal, except where minimal results due to effective remaining maturity) of "equity credit" (or such similar nomenclature then used by S&P at the time of such redemption or repurchase), or*
- (v) *if such redemption or repurchase occurs on or after: 18 October 2049.*

The replacement intention of the Issuer and the Guarantor, including during the period of five years following the Interest Commencement Date, shall not apply for repurchases of Notes with an aggregate amount up to the S&P Excess Amount. "S&P Excess Amount" means the aggregate principal amount of outstanding hybrid capital of the Guarantor and any Subsidiaries of the Guarantor exceeding the maximum aggregate principal amount of hybrid capital for which S&P under its then prevailing methodology would recognize equity credit from time to time based on the Guarantor's adjusted total capitalization.

Terms used but not defined in the paragraphs above shall have the meaning set out in the Terms and Conditions.

4. Steuern

Sämtliche auf die Garantie zu zahlenden Beträge werden von der Garantin ohne Abzug oder Einbehalt gegenwärtiger oder zukünftiger Steuern, Abgaben oder amtlicher Gebühren gleich welcher Art gezahlt, die von oder in dem Land, in dem die Garantin ihren Hauptsitz oder Steuersitz hat, oder für dessen Rechnung oder von oder für Rechnung einer dort zur Steuererhebung ermächtigten Gebietskörperschaft oder Behörde auferlegt, erhoben oder eingezogen werden (nachstehend zusammen "**Quellensteuern**" genannt), es sei denn, ein solcher Abzug oder Einbehalt an der Quelle ist gesetzlich vorgeschrieben. Sofern die Garantin gesetzlich zu einem solchen Einbehalt oder Abzug verpflichtet ist, wird sie die zusätzlichen Beträge ("**zusätzlichen Beträge**") zahlen, die erforderlich sind, damit der dem Anleihegläubiger nach diesem Abzug oder Einbehalt an der Quelle zufließende Nettobetrag jeweils den Beträgen an Kapital und Zinsen entspricht, die ihm zustehen würden, wenn der Abzug oder Einbehalt nicht erforderlich wäre. No such Additional Amounts shall, however, be payable on account of any taxes, duties or governmental charges which:

- (i) are payable by any person acting as custodian bank, depositary or collecting agent on behalf of a Noteholder, or otherwise in any manner which does not constitute a deduction or withholding by the Guarantor from payments made by it; or

- (iv) are to be deducted or withheld pursuant to (i) any European Union Directive or Regulation concerning the taxation of interest income, or (ii) any international understanding relating to such taxation to which the country where the Guarantor has its domicile or tax residence or the European Union is a party, or (iii) any provision of law implementing or complying with such Directive, Regulation or understanding; or

DESCRIPTION OF THE ISSUER

Incorporation, Registration, Shareholder, Share Capital and Fiscal Year

Incorporation and Registration

The Issuer was originally incorporated on 16 September 1994 for an unlimited duration as a private company with limited liability (*Besloten Vennootschap met beperkte aansprakelijkheid* (B.V.)) under the laws of the Netherlands. Its corporate seat (*statutaire zetel*) was in Amsterdam, the Netherlands. It was registered with the Dutch Chamber of Commerce (*Kamer van Koophandel*) under number 33262213. Its registered office was at De Entrée 99-197, 1101 HE Amsterdam, the Netherlands.

In order to reduce costs and operational complexity, the Issuer decided to execute a cross-border transformation (the "**Transformation**") of the Issuer into a German law governed German limited liability company (*Gesellschaft mit beschränkter Haftung* – GmbH) and to transfer the statutory and administrative seat of the Issuer to Berlin, Germany.

By resolution of 22 August 2017 before a Dutch notary public, and of 23 August 2017 before a German notary public, the general meeting of the Issuer resolved on the Transformation.

The Transformation took effect with the registration of Deutsche Bahn Finance GmbH in the commercial register of the local court of Berlin-Charlottenburg on 1 September 2017.

As a result of the Transformation, the Issuer did not cease to exist. Instead, it changed its legal form to a German GmbH and its statutory and administrative seat to Berlin, Germany. Accordingly, the new legal and commercial name of the Issuer is Deutsche Bahn Finance GmbH and its new address is Europaplatz 1, 10557 Berlin, Germany.

Deutsche Bahn Finance GmbH is registered in the commercial register of the local court of Berlin-Charlottenburg under register number HRB 189 333 B.

Shareholder

The share capital thus equals the issued capital of the Issuer prior to the Transformation. The share capital is divided into 100,000 shares with a nominal value of EUR 1.00 per share.

Fiscal Year

Prior to the Transformation, the fiscal year of the Issuer was the calendar year. However, due to the Transformation, the last fiscal year in which the Issuer reported pursuant to generally accepted accounting standards in the Netherlands ended on 31 August 2017. The Issuer's first fiscal year in which it reported pursuant to generally accepted accounting standards in Germany commenced on 1 September 2017 and ended on 31 December 2017, after which time the fiscal year of the Issuer became the calendar year once again.

During the financial year 2018, DB Group underlined its long-term approach to business by making gross capital expenditures of € 11,205 million, about 7 per cent. more than in 2017 (2017: € 10,464 million). In the first half of 2019 the increase in gross capital expenditures mainly resulted from the inclusion of finance leases due to the change in accounting for obligations under leases (IFRS 16). Increased capital expenditures in rail infrastructure has also boosted capital expenditures.

DB Group continues to focus its capital expenditure on the business units of the integrated rail system, in particular measures to improve performance and efficiency in the area of rail infrastructure and vehicles.

1) Net capital expenditures = gross capital expenditures less non-repayable investment grants.

The structure of gross capital expenditures was still dominated by the business units in the infrastructure division (in H1 2019 mainly DB Netze Track at around 60 per cent. (2018: around 62 per cent, H1 2018: around 63 per cent, 2017: around 63 per cent.)).

Broken down by regions, the focus of gross capital expenditures remained in Germany.

The principal elements of the capital expenditures activities in 2018 and in the first half of 2019 were again measures to improve the performance and efficiency of the rail infrastructure and the continued rejuvenation of the vehicle fleet mainly for rail services.

In accordance with the relevant legal regulations, DB Group's capital expenditures in infrastructure are generally financed by means of investment grants netted with properties and – to a lesser extent – funds obtained under the Local, Regional and Municipal Transport Financing Act and the Railway Crossings Act, as well as a considerable range of internal funds.

DB Group at a Glance

Group Structure and Principles of Cooperation within the Group

The business portfolio of DB Group is primarily organized into eight business units. Within the DB Group structure, DB AG functions as management holding company that leads DB Group. The close connection between DB AG and the major Group companies is supported by profit and loss transfer agreements, domination agreements and tax-pooling agreements. One of the desired effects of the holding structure is the ability to allow the business units, as market specialists in their respective fields, to make operational decisions. The business units are responsible for the conduct of the business operations. The structure of DB Group ensures that the inter-company benefits of the closely-networked and mutually-dependent business units are maintained to the extent possible. The Group structure is rounded out by central group and service functions.

Passenger Transport

Mobility services are one of the core competencies of DB Group. The DB Long-Distance, DB Regional and DB Arriva business units focus on providing the mobility services customers want.

The Passenger Transport division offers rail and bus transport as well as other increasingly important intermodal mobility products. DB Group develops its transport services with customers' needs in mind and transforming them into comprehensive mobility services. This applies to both national and international mobility and concurrently involves optimizing the cross-over points where passengers switch from one mode of transport to another. DB Group's aim is to intelligently link rail transport offers to other modes of transport via a smoothly functioning cross-over process. The CityTicket function of the BahnCard currently allows passengers to continue travelling via public transport in their destination city. DB Group is making the uncomplicated use of public transport at any time a reality for customers through its mobile ticket services.

DB Long-Distance business unit

The DB Long-Distance business unit offers national and cross-border long-distance rail transport services. Regularly scheduled daily service is the core business of long-distance transport. DB Group wants to convince customers of its offers and intends to expand its market share by keeping its promise of providing quick and comfortable connections directly into cities at attractive prices. Furthermore, the business unit also offers bus transports. Beyond its services in Germany DB Group is gradually expanding its international offerings.

DB Regional business unit

All of DB Group's regional bus and rail transport activities in Germany, as well as cross-border regional transport services to and from Germany, were bundled together in the DB Regional business unit.

In rail transport, the business unit offers an extensive regional network in Germany, with connections to urban areas and surrounding regions. Regionally-oriented transport operations connect on-site, offering planning and the provision of services in cooperation with contracting agencies and transport associations, aiming at an integrated regional transport program of rail and bus adapted to local transport requirements.

In the German bus transport market, the DB Regional business unit aims at defending its strong market position in an increasingly intense competitive environment, among others by implementing extensive efficiency programs to meet the increasing cost pressures resulting from public tenders.

DB Arriva business unit

With buses, trains, trams, water buses, car- and bike-sharing systems, DB Arriva offers a wide range of transport solutions and will continue to provide its customers with efficient and economic transport solutions that fit their needs.

DB Arriva is active in several European countries, including Croatia (bus), the Czech Republic (bus and rail), Denmark (bus, rail and waterbus), Great Britain (bus, rail and patient transport), Hungary (bus), Italy (bus, rail, waterbus and tram), the Netherlands (bus, rail and waterbus), Poland (bus and rail), Portugal (bus, rail and tram), Serbia (bus), Slovakia (bus), Slovenia (bus), Spain (bus) and Sweden (bus, rail and tram).

DB Arriva's core competencies include cooperating with national, regional and local contracting organizations as well as the fulfilment of transport contracts and meeting the requirements of contracting organization.

Both DB Regional's and DB Arriva's main source of earnings are either ticket sales or mid-/ long-term concession fees paid by public authorities. Their focus is to continually improve the quality and service, winning (or retaining) transport.

In spring of 2019, Deutsche Bahn has launched a dual-track process to explore a potential divestment of DB Arriva. The process explores both a potential trade sale and a potential initial public offering (IPO) on the Euronext Amsterdam.

Freight transport and logistics

In freight transport and logistics, DB Group operates under the DB Schenker and DB Cargo brands. DB Schenker is a globally integrated logistics service provider. DB Cargo is a leading rail freight operator in Europe.

DB Schenker features a dense network of locations in the world's most significant economic regions, in air and ocean freight, European land transport, contract logistics and supply chain management. This combination of capabilities enables DB Group to offer quick and efficient solutions for the various requirements of customers from trade and industry.

DB Schenker and DB Cargo offer their customers worldwide solutions from bulk goods to parcels, via all modes of transport along the entire logistics chain by connecting DB Cargo's position in European rail transport and DB Schenker's position in land transport with a strong position in the worldwide air and ocean freight business, as well as contract logistics and supply chain management.

International markets are growing, and the outsourcing of complete service packages is advancing. These trends will continue in the next few years. This means that not only will transport needs increase, the demands on all partners will also increase. In view of current and future customer requirements it is also necessary to integrate rail freight transport into comprehensive logistics offerings. DB Group oriented DB Group's activities to achieve this early on.

DB Cargo business unit

DB Cargo is one of Europe's largest providers of international network services in rail freight transport (based on volume sold) according to Deutsche Bahn's internal research. DB Cargo has strategically positioned itself in Europe, with its own companies as well as with partners, thus enabling DB Cargo to also offer customers a uniform level of quality in international transport business.

DB Cargo's range of products extends from open network systems for transport of single wagons or wagon groups, through to block trains as point-to-point transports, to selected additional logistical services (e.g. road/rail transhipment of bulk goods in railports, or maintenance). DB Cargo has special know-how in the areas of iron, coal and steel (Montan), chemicals, petroleum-based products, agricultural products, forestry, consumer goods freight, building materials and waste disposal.

DB Schenker business unit

Its presence in over 130 countries enables DB Schenker to assert itself as a global player in competitive markets with attractive growth prospects. DB Schenker is one of the leading providers of land transport (based on revenues), global air (based on tonnage) and ocean (based on TEU) freight as well as contract logistics (based on revenues), according to DB Group's internal research. DB Schenker's aim is to hold and expand this position in the future. This is why it has reinforced its networks systematically in the past few years by making major investments in logistics centers, IT infrastructure and acquisitions. At the same time, DB Schenker was able to further optimize the cost-effectiveness and quality of its offerings.

Infrastructure

A high-quality and reliable infrastructure is a central prerequisite for ensuring smooth rail transport and therefore the long-term competitiveness of rail transport. In order to optimize its services, DB Group has bundled its infrastructure expertise under the brand "DB Netze." Free and easy access to the rail infrastructure in Germany, individual services

and high reliability – this is what the business units DB Netze Track, DB Netze Stations and DB Netze Energy stand for.

DB Netze Track business unit

The DB Netze Track business unit is the service provider for about 440 train operating companies ("TOCs") – including 422 non-Group railways – all of which use the German rail network, approximately 33,000 km long and the largest in Europe. Due to its central location this network is highly significant for the whole transport economy in Europe.

The German rail network has been open for use to all TOCs authorized in Germany without discrimination since 1994. DB Netz AG independently ensures non-discriminatory access to DB Group's infrastructure.

DB Netze Track creates the foundation for high performance and reliable rail transport with a high quality rail network that is oriented towards the needs of TOCs. DB Netze Track ensures the safe operation of its rail infrastructure (long-distance/major metropolitan areas network, regional network, marshalling yards and maintenance facilities), the marketing of customer-oriented track usage offerings and the preparation of schedules in close collaboration with the TOCs. In addition to this, DB Netze Track also carries out maintenance and repair work, further develops the rail infrastructure by making capital expenditures in the existing network, modern command and control technology. DB Netze Track also builds new lines and upgrades old lines. The financing of the infrastructure by the Federal and the state governments plays a central role in all of these activities.

DB Netze Stations business unit

The passenger stations of DB Netze Stations serve as gateways to the rail system, acting as hubs linking various modes of transport in addition to their roles as marketplaces and attraction points for cities and regions. The business unit's activities include the operation of passenger stations as traffic stations as well as the development and marketing of train stations. DB Netze Stations is responsible for ensuring non-discriminatory access to its infrastructure. The number of station stops for non-Group customers has been increasing for years. In addition to construction measures, emphasis is placed on comprehensive service competence, a high level of safety, good customer information and functional route management. Moreover, there is also the fact that the rental business strengthens earnings power, especially in train stations that are often frequented by customers.

DB Netze Energy business unit

The DB Netze Energy business unit bundles together the responsibility to provide TOCs with power derived from a range of energy sources with the technical know-how needed to perform this task. In addition to planning, maintenance, marketing and the operation of technically complex energy networks, the sustainable generation and procurement of traction and stationary energy are also included in the range of services. As an independent energy manager, DB Netze Energy enables the smooth operation of services by providing supply traction power and fuels on a non-discriminatory basis to all TOCs in Germany. Furthermore, DB Netze Energy provides energy services for private customers and business customers from industry, trade and the services sector.

Trends and Implications that affect Future Business

DB Group's environment is in a state of constant change. The DB trend landscape outlines the most important developments with regard to the four trend clusters of customers, society, politics and global economy, towards which DB Group gears its activities in order to benefit from opportunities at an early stage and to address risks in a comprehensive manner. These trends represent both challenges and opportunities for Deutsche Bahn's business activities.

- ***Customers:*** Customer needs and expectations have changed significantly over the last few years, particularly as a result of digitization. Customers ask for intermodal interlinked mobility and logistics services which can be conveniently managed while on the go and in real time. At the same time, demand is also growing for environmentally and socially sustainable products. Fewer and fewer young people in Europe have their own car, and purchasing power related to mobility is projected to drop overall as a result of rising cost of living and of provision for old age. These developments represent major challenges to DB Group, but they

also present DB Group with opportunities – for instance, in terms of further growth in public transport through new products and services.

- *Society*: From a global perspective, population growth is continuing. Increasing numbers of people are moving to the cities in search of work and prosperity. As a result, the demand for more efficient low-emissions mobility and logistics solutions will increase. This also applies to Europe, even though birth rates are stagnant, and the population is ageing. It is also intensifying the competition among employers for talent.
- *Politics*: The political environment is characterized by an increasing acceptance of state regulation and a concurrent call for increased competition and liberalization. Climate change is a central issue in this context. The discussion surrounding binding targets for CO₂ reduction has not seen results at UN level until recently. Germany, on the other hand, is maintaining its role as a pioneer and is continuing in its efforts to convert to renewable energy. However, the arrangements and allocation of costs related to the electricity transition are subject to controversy. Government debt levels are also continuing to rise in many countries in the European Union (EU), limiting funds both for investments in infrastructure and for grants for local transport. At the same time, the European Commission's attempts at liberalization are also aimed at achieving further quality improvements in the traffic sector. However, actual implementation of new mobility concepts with greater linkage and the promotion of low emission drives, has so far been taking place based on local initiatives in towns and major cities where heavy volumes of traffic are increasing the pressure to act.
- *Global economy*: The structure of the global economy has faced increasing global risks since the 2008/2009 financial crisis. While the ascent of emerging nations – particularly China – is continuing, this might not be on a permanent basis, thereby harboring further risks for the global economy. The flows of commodities for many products will be regionalized with the ascent of the emerging nations. The share of intra-Asia transports will increase in particular. This is also associated with the changing conditions for value creation in logistics, which are strengthening as a result of technical innovations and increasingly sparse oil resources. The decrease in availability of crude oil will put increased pressure for innovation on the mobility and logistics sector. Growing global transport needs will not be met in the long term without drive technology which is not dependent on oil.

Financial Relationship with the Federal Republic of Germany or the Federal States

Apart from the equity holding, the following financial relationships exist as a result of legal provisions:

- The civil servants of the former Deutsche Bundesbahn are in principle assigned to provide services to DB Group. Their salaries will be paid from the Federal Railway Fund. DB Group will reimburse the Federal Railway Fund for the personnel costs only up to the corresponding amount which DB Group would have to pay for new employees.
- Capital expenditures into Germany's track infrastructure are financed mainly through non-repayable investment grants from the Federal Republic of Germany. A Service and Financing Agreement (*Leistungs- und Finanzierungsvereinbarung*; the "LuFV") between the Federal Government and the rail infrastructure companies of DB Group took effect in January 2009. Based on this agreement, the Federal Government was obligated to provide € 2.5 billion to DB Group every year between 2009 and 2013 to maintain the existing rail network, stations and power facilities. The LuFV was initially limited to the end of 2013. To date these negotiations have not been concluded, particularly with regard to the allocation of funds necessary for the maintenance of the existing network and, as a result, an extension to the existing contract for the year 2014 was agreed upon at the beginning of September 2013. The LuFV I was replaced by the follow-up agreement LuFV II with effect from 1 January 2015. Under the terms of the LuFV II, the contractually defined volume of funds was considerably increased: the infrastructure contribution of the Federal Government was increased to an average of € 3.316 billion per calendar year. The planned dividend distribution of DB AG on the basis of the profit after taxes of the rail infrastructure companies of DB Group ("RIC") amounts to an average of € 440 million per year. The dividend distributions are reinvested completely in the rail infrastructure as Federal grants. The element for improving local rail passenger transport was increased to € 1.1 billion for the entire life of the LuFV II. The maintenance contribution to be provided by the RICs has

increased to a minimum of € 8.0 billion for the life of the LuFV II. The DB Group funds for capital expenditures to be provided by the RICs every year on the other hand now amount to € 100 million per annum (LuFV I: € 500 million per year). Currently the LuFV III is under negotiation and should come into force on 1 January 2020.

- On 1 January 1996, the functional and financial responsibility for local railway passenger services was transferred from the Federal Republic of Germany to the Federal States. Since then, the Federal States or the municipalities (*Gemeinden*) or special purpose associations (*Zweckverbände*), have "ordered" and will "order" regional services from DB Group. They are required to pay for services rendered, determined in agreements with DB Group on a case-by-case basis. In October 2015, the Federal Government and the Federal States reached agreement on funding public local passenger transport in Germany, and thus created a reliable funding base for the Federal States, transport authorities and train operating companies. The Federal Government is increasing the regionalization funds to € 8.0 billion in 2016. This money is used by the Federal States primarily to fund local rail passenger transport. The subsidy is scheduled to increase by 1.8 per cent. every year from 2017 until 2031. In return, the Federal States must provide regular details on the specific utilization of the funds. The Third Act amending the Regionalization Act came into force on 1 January 2016.

Board Practice

Audit and Compliance Committee of the Supervisory Board

The Audit and Compliance Committee supports the Supervisory Board in the performance of its monitoring role. It deals in particular with issues of accounting, risk management and compliance, the necessary independence of the auditor, the process of awarding the audit engagement to the auditor, determining key audit issues and the fee agreement. In addition, within the framework of its monitoring role, the Audit and Compliance Committee is also informed of compliance with the recommendations of the Public Corporate Governance Codex. The Audit and Compliance Committee comprises two shareholders' representatives on the Supervisory Board and two employees' representatives on the Supervisory Board. The Chairman of the Audit Committee is not the Chairman of the Supervisory Board, nor is he a former member of the Management Board of DB AG. He has special knowledge and experience in the application of accounting principles and internal control procedures. The Chairman of the Audit and Compliance Committee is Dr. Jürgen Krumnow. Further members are Guido Beermann, Jörg Hensel and Regina Rusch-Ziemba.

Corporate Governance

The Federal Government established the Public Corporate Governance Code of the Federal Government (the "PCGK") on 1 July 2009 to create standards of good corporate and investment governance. The PCGK contains significant provisions of current laws for managing and supervising non-listed companies in which the Federal Government holds a majority stake, and it also includes internationally and nationally recognized standards for good and responsible governance. The objective of the PCGK is to make corporate governance and oversight more transparent and understandable, and to more clearly define the Federal Government's role as a shareholder representative. At the same time, it is intended to promote the awareness of good corporate governance.

The Supervisory Board of DB AG has adopted the A rules of procedure 1 for the Management Board and Supervisory Board of DB AG to meet PCGK requirements. The PCGK applies to the DB Group companies to the legal extent possible and technically appropriate in view of the special features of a Group structure. Group-wide compliance with the PCGK principles was established by approval of sample rules of procedure for the Supervisory Boards of the Group companies.

Declaration of Conformity

The Management Board and Supervisory Board of DB AG have issued the following joint statement:

Since the last statement of compliance was published on 21 March 2018, DB AG has complied with the recommendations adopted by the Federal Government on 1 July 2009, concerning the PCGK, with the exception of point 3.3.2 (the insurance deductible when taking out D&O liability insurance for the Supervisory Board). DB AG will continue to comply with the regulations with the exception mentioned above.

Recent Developments

On 19 June 2019 the Management Board of DB AG presented DB Group's new Strong Rail umbrella strategy. Three areas of development have been identified: more robust, more powerful and more modern. Business units of strategic importance for a strong rail system, such as DB Schenker, will be continued as financial investment. Joint operational initiatives will focus on achieving synergies within the integrated network. Operations with no strategic relevance to a strong rail system like DB Arriva will be reviewed and may be disposed of.

In spring of 2019, Deutsche Bahn has launched a dual-track process to explore a potential divestment of DB Arriva. The process explores both a potential trade sale and a potential initial public offering (IPO) on the Euronext Amsterdam.

On 20 September 2019, the German Federal Government has presented its climate action strategy to reach its 2030 climate targets. As part of the envisaged package, the German Federal Government has stated its intention to invest, from 2020 to 2030, the amount of € 1 billion per year to the equity capital of Deutsche Bahn AG, in order to modernise, expand and further electrify the railway system.

On 8 October 2019, S&P Global Ratings Europe Limited ("Standard & Poor's") announced that it had raised the long-term credit rating of the Guarantor from "AA-" to "AA" and confirmed the "stable" outlook as well as the "A-1+" short-term rating.

Also on 8 October 2019, Moody's Investors Services Limited ("Moody's") affirmed its long-term credit rating of the Guarantor of "Aa1" but adjusted the outlook from "stable" to "negative". Moody's short-term rating of the Guarantor remained unchanged at "P-1".

Rating

An investment in the Notes bears the risk that the Issuer or the Guarantor, are not able to fulfil their obligations created by the issuance of the Notes, or the Subordinated Guarantees respectively, on the relevant due date.

In order to assess the risk, prospective investors should consider all information provided in this Prospectus and consult with their own professional advisers if they consider it necessary.

The risk related to an issuer's ability to fulfil its obligations created by the issuance of debt securities is described by reference to the credit ratings assigned by independent rating agencies. A credit rating is an assessment of the solvency or credit-worthiness of creditors and/or bond-issuers according to established credit review procedures. These ratings and associated research help investors analyse the credit risks associated with fixed-income securities by providing detailed information on the ability of issuers to meet their obligations. The lower the assigned rating is on the respective scale, the higher the respective rating agency assesses the risk that obligations will not, not fully and/or not timely be met.

Rating agencies may change their ratings at short notice. A rating is not a recommendation to buy, sell or hold any Notes and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. A suspension, reduction or withdrawal of any assigned rating may adversely affect the market price of the Notes.

DB AG is rated by Standard & Poor's and Moody's (together, the "**Rating Agencies**").

Each of the Rating Agencies is established in the European Union and registered (pursuant to the list of registered and certified credit rating agencies published on the website of the European Securities and Markets Authority (www.esma.europa.eu)) under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended.

As at the date of this Prospectus, the ratings assigned by the Rating Agencies to DB AG were as follows:

	Standard & Poor's	Moody's:
Long-term rating:	AA	Aa1
Short-term rating:	A-1+	P-1
Outlook	stable	negative

Rating Definitions Standard & Poor's:

Long-term rating:

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

Short-term rating:

A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

Rating Definitions Moody's:

Long-term rating

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Short-term rating

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

Together with some 35 other German companies and organizations with global operations, DB Group is an active member of ECONSENSE, the forum for the sustainable development of the German economy. The shared aim of all members is to develop solutions for sustainable business, initiate political decision-making processes and thereby pool and drive innovations and strategies for future-oriented issues.

Within the framework of combatting corruption, DB Group is a corporate member of Transparency International. Regular discussions take place regarding experiences with anti-corruption systems and procedures with corresponding standards set as part of Deutsche Bahn's efforts to combat corruption. DB Group and other companies benefit from the exchange with respect to their future activities.

Greenhouse gas footprint

DB Group's adjusted greenhouse gas footprint shows the amount of greenhouse gases (gases that affect climate change, such as methane and nitrous oxide, which are converted to CO₂ based on their equivalent climate impact) that DB Group emitted in one year. It consists of the emissions from all journeys and transports of DB Group by rail, road, air transport and shipping and the emissions of stationary facilities such as stations or workshops and of the fleet, which includes, for example, company cars. These figures provide the basis for calculating specific greenhouse gas emissions and determining the results of our climate target within the limits set. They also act as a benchmark for our efficiency improvement measures and provide a basis for comparison with other companies.

TAXATION

The following is a general overview of certain tax considerations relating to the purchasing, holding and disposing of Notes. It does not purport to be a complete analysis of all tax considerations relating to the Notes. In particular, this discussion does not consider any specific facts or circumstances that may apply to a particular Noteholder. The discussions that follow for each jurisdiction are based upon the applicable laws in force and their interpretation on the date of this Prospectus. These tax laws and interpretations are subject to change that may occur after such date, even with retroactive effect.

The information contained in this section is limited to taxation issues and prospective investors should not apply any information set out below to other areas, including (but not limited to) the legality of transactions involving the Notes.

Prospective holders of Notes (the "Noteholders" and each a "Noteholder") should consult their own tax advisers as to the particular tax consequences of subscribing, purchasing, holding and disposing the Notes, including the application and effect of any federal, state or local taxes, under the tax laws of each country of which they are residents or citizens.

Responsibility of the Issuer for the withholding of taxes at source

The Issuer does not assume any responsibility for the withholding of taxes at source.

Taxation in the Grand Duchy of Luxembourg

The following information is of a general nature only and is based on the laws presently in force in Luxembourg, though it is not intended to be, nor should it be construed to be, legal or tax advice. The information contained within this section is limited to Luxembourg to certain withholding tax issues and prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present section to a withholding tax or a tax of a similar nature, or to any other concepts, refers to Luxembourg tax law and/or concepts only.

Withholding Tax

Under Luxembourg tax law currently in effect and subject to the exception below, there is no Luxembourg withholding tax on payments of interest (including accrued but unpaid interest) or repayments of principal.

In accordance with the law of 23 December 2005, as amended, interest payments made by Luxembourg paying agents to individual beneficial owners, which are residents of Luxembourg, are subject to a 20 per cent. withholding tax. Responsibility for withholding such tax will be assumed by the Luxembourg paying agent. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth.

Income Taxation

Non-resident Noteholder

A non-resident Noteholder, not having a permanent establishment or permanent representative in Luxembourg to which or to whom such Notes are attributable, is not subject to Luxembourg income tax on interest accrued or received, redemption premiums or issue discounts, or any other income under the Notes. A gain realised by such non-resident Noteholder on the sale or disposal, in any form whatsoever, of the Notes is further not subject to Luxembourg income tax.

A non-resident Noteholder acting in the course of the management of professional or business undertaking, who has a permanent establishment or permanent representative in Luxembourg to which or to whom such Notes are attributable, is subject to Luxembourg income tax on interest accrued or received, redemption premiums or issue discounts, or other income under the Notes, and on any gains realised upon the sale or disposal, in any form whatsoever of the Notes.

Resident Noteholder

Noteholder who/which are resident of Luxembourg will not be liable for any Luxembourg income tax on repayment of principal.

Luxembourg resident corporate Noteholder

A corporate Noteholder must include any interest accrued or received, any redemption premium or issue discount, as well as any gain realized on the sale or disposal, in any form whatsoever, of the Notes, in its taxable income for Luxembourg income tax assessment purposes.

Corporate Noteholder that are governed by the law of 11 May 2007 on family estate management companies, as amended, or by the law of 17 December 2010 on undertakings for collective investment, as amended, or by the law of 13 February 2007 on specialised investment funds as amended, or by the law of 23 July 2016 on reserved alternative investment funds (provided it is not foreseen in the incorporation documents that (i) the exclusive object is the investment in risk capital and that (ii) Article 48 of the aforementioned law of 23 July 2016 apply), are tax exempt entities in Luxembourg, and are thus not subject to any Luxembourg tax (i.e., corporate income tax, municipal business tax and net wealth tax) other than the annual subscription tax calculated on their (paid up) share capital (and share premium) or net asset value.

Luxembourg resident individual Noteholder

An individual Noteholder, who acts in the course of the management of his private wealth and who is a resident of Luxembourg for tax purposes, has further to include the portion of the gain corresponding to accrued but unpaid interest in respect of the Noteholder in his taxable income, except if (i) withholding tax has been levied on such payments in accordance with the law of 23 December 2005, or (ii) the individual Noteholder has opted for the application of a 20 per cent. withholding tax in full discharge of income tax in accordance with the law of 23 December 2005, which applies if a payment of interest has been made or ascribed by a paying agent established outside Luxembourg in an EU Member State, or in a State of the European Economic Area other than an EU Member state.

The above 20 per cent. withholding tax represents the final tax liability on interest received for the Luxembourg resident individuals receiving the interest payments in the course of their private wealth and can be refunded in consideration of foreign withholding tax, based on double tax treaties concluded by Luxembourg.

Under Luxembourg domestic tax law, gains realised by an individual Noteholder, who acts in the course of the management of his private wealth and who is a resident of Luxembourg for tax purposes, on the sale or disposal, in any form whatsoever, of Notes are not subject to Luxembourg income tax, provided this sale or disposal took place six months after the acquisition of the Notes, or that the sale or disposal does not precedes the acquisition of the Notes.

An individual Noteholder acting in the course of the management of professional or business undertaking must include any income under the Notes in its taxable basis. In that event, such 20 per cent. withholding tax levied will be credited against its final income tax liability.

Net Wealth Taxation

A corporate Noteholder, whether it is a resident of Luxembourg for tax purposes or, if not, it maintains a permanent establishment or a permanent representative in Luxembourg to which such Notes are attributable, is subject to Luxembourg net wealth tax on such Notes, except if the Noteholder is governed by the law of 11 May 2007 on family estate management companies, as amended, or by the law of 17 December 2010 on undertakings for collective investment, as amended, or by the law of 13 February 2007 on specialised investment funds, or is a securitisation company governed by the law of March 22, 2004 on securitisation, as amended, or is a capital company governed by the law of 15 June 2004 on venture capital vehicles, as amended or is a reserved alternative investment fund governed by the law of 23 July 2016. However, a securitisation company subject to the amended law of 22 March 2004 and a company subject to the amended law of 15 June 2004 on venture capital vehicles are, as from 1 January 2016, subject to a minimum net wealth tax, as well as reserved alternative investment funds subject to the law of

23 July 2016, provided it is foreseen in the incorporation documents that (i) the exclusive object is the investment in risk capital and that (ii) Article 48 of the aforementioned law of 23 July 2016 applies.

An individual Noteholder, whether he/she is resident of Luxembourg or not, is not subject to Luxembourg net wealth tax on the Notes.

Inheritance and Gift Tax

Where a Noteholder is a resident of Luxembourg for tax purposes at the time of his/her death, the Notes are included in his/her taxable estate for inheritance tax assessment purposes.

Gift tax may be due on a gift or donation of Notes if embodied in a Luxembourg deed passed in front of a Luxembourg notary or recorded in Luxembourg.

Other Taxes

In principle, neither the issuance nor the transfer, repurchase or redemption of Notes will give rise to any Luxembourg registration tax or similar taxes.

However, a fixed or ad valorem registration duty may be due in case the Notes must be produced before an official Luxembourg authority, or in the case of a registration of the Notes on a voluntary basis, or if the Notes are appended to a document that requires mandatory registration.

Taxation in the Federal Republic of Germany

The following is a general discussion of certain German tax consequences of the acquisition, holding and disposal of the Notes. It does not purport to be a comprehensive description of all German tax considerations that may be relevant to a decision to purchase Notes, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This discussion of the tax consequences of an investment in the Notes is based on the tax laws of Germany currently in force and as applied on the date of this Prospectus, which are subject to change, possibly with retroactive or retrospective effect.

Tax resident Noteholders of the Notes

The section "*Tax resident Noteholders of the Notes*" refers to persons who are tax residents of Germany (i.e. persons whose residence, habitual abode, statutory seat, or place of effective management is located in Germany).

Withholding tax on interest payments and capital gains

Interest payments received by an individual Noteholder of the Notes will be subject to German withholding tax if the Notes are kept or administrated in a custodial account with a German branch of a German or non-German credit institution (*Kreditinstitut*) or financial services institution (*Finanzdienstleistungsinstitut*), a German securities trading company (*Wertpapierhandelsbank*) or a German securities trading bank (*Wertpapiersammelbank*) (each a "**Disbursing Agent**", *auszahlende Stelle*). The flat income tax rate is 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon, the total withholding being 26.375 per cent.). An electronic information system for withholding of church tax will apply to individuals subject to church tax in relation to investment income, with the effect that church tax will be collected by the Disbursing Agent by way of withholding unless the investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*) in which case the investor will be assessed to church tax.

The same treatment applies to capital gains (i.e. the difference between the proceeds from the disposal, redemption, repayment or assignment after deduction of expenses directly related to the disposal, redemption, repayment or assignment and the cost of acquisition) derived by an individual Noteholder provided the Notes have been held in a custodial account with a Disbursing Agent since the time of their acquisition. If Notes held or administrated in the same custodial account have been acquired at different points in time, the Notes first acquired will be deemed to have been sold first for the purposes of determining the capital gains. Where Notes are acquired and/or sold or redeemed in a currency other than Euro, the sales/redemption price and the acquisition costs have to be converted into Euro on the basis of the foreign exchange rates prevailing on the sale or redemption date and the acquisition date respectively. If interest coupons or interest claims are disposed of separately (i.e. without the Notes), the proceeds from the

disposition are subject to withholding tax. The same applies to proceeds from the payment of interest coupons or interest claims if the Notes have been disposed of separately.

To the extent the Notes have not been kept in a custodial account with a Disbursing Agent since the time of their acquisition, upon the disposal, redemption, repayment or assignment withholding tax applies at a rate of 26.375 per cent. (including solidarity surcharge, plus church tax, if applicable) on 30 per cent. of the disposal proceeds (plus interest accrued on the Notes ("Accrued Interest", *Stückzinsen*, if any), unless the investor or the previous depository bank was able and allowed to prove evidence for the investor's actual acquisition costs to the Disbursing Agent.

In computing any German tax to be withheld, the Disbursing Agent may generally deduct from the basis of the withholding tax negative investment income realised by the individual Noteholder of the Notes via the Disbursing Agent (e.g. losses from the sale of other securities with the exception of shares). The Disbursing Agent may also deduct Accrued Interest on the Notes or other securities paid separately upon the acquisition of the respective security via the Disbursing Agent. In addition, subject to certain requirements and restrictions the Disbursing Agent may credit foreign withholding taxes levied on investment income in a given year regarding securities held by the individual Noteholder in the custodial account with the Disbursing Agent.

Individual Noteholders may be entitled to an annual allowance (*Sparer-Pauschbetrag*) of EUR 801 (EUR 1,602 for jointly assessed individual Noteholders) for all investment income received in a given year. Upon the individual Noteholder filing an exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent, the Disbursing Agent will take the allowance into account when computing the amount of tax to be withheld. No withholding tax will be deducted if the Noteholder of the Notes has submitted to the Disbursing Agent a certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the competent local tax office.

German withholding tax will not apply to gains from the disposal, redemption, repayment or assignment of Notes held by a corporation as Noteholder while ongoing payments, such as interest payments, are subject to withholding tax (irrespective of any deductions of foreign tax and capital losses incurred). With regard to gains from the disposal, repayment or assignment of Notes held by an individual Noteholder, a business partnership or through the permanent establishment of a non-resident taxpayer, the same may apply upon application where the Notes form part of a trade or business, subject to further requirements being met.

The Issuer is not obliged under German law to withhold any withholding tax (*Kapitalertragsteuer*) on interest payments and upon the sale or redemption of the Notes.

Taxation of current income and capital gains

The personal income tax liability of an individual Noteholder deriving income from capital investments under the Notes is, in principle, settled by the tax withheld. To the extent withholding tax has not been levied, such as in the case of Notes kept in custody abroad or if no Disbursing Agent is involved in the payment process, the individual Noteholder must report his or her income and capital gains derived from the Notes on his or her tax return and then will also be taxed at a rate of 25 per cent. (plus solidarity surcharge and church tax thereon, where applicable). If the withholding tax on a disposal, redemption, repayment or assignment has been calculated from 30 per cent. of the disposal proceeds (rather than from the actual gain), an individual Noteholder may and in case the actual gain is higher than 30 per cent. of the disposal proceeds must also apply for an assessment on the basis of his or her actual acquisition costs. Further, an individual Noteholder may request that all investment income of a given year is taxed at his or her lower individual tax rate based upon an assessment to tax with any amounts over withheld being refunded. In each case, the deduction of expenses (other than transaction costs) on an itemized basis is not permitted.

The coalition agreement between the German Christian Democratic Party, the German Christian Social Union and the German Social Democratic Party for the formation of the current German federal government provides that the flat tax regime shall be partially abolished for certain capital investment income, including interest income. That means that income received by Noteholders holding the Notes as private assets may be taxed at individual progressive income tax rates of up to 45 per cent. in the future (plus a 5.5 per cent. solidarity surcharge thereon and church tax, if applicable to the individual Noteholder). According to a recently published draft bill of the German federal ministry of finance for the amendment of the solidarity surcharge act dated 6 August 2019, the solidarity surcharge shall only be levied for wage tax and income tax purposes from the assessment period 2021 onwards if the individual income

tax of the holder exceeds the threshold of EUR 16,956 (EUR 33,912 for jointly assessed investors). Pursuant to the draft bill, the solidarity surcharge shall remain in place for purposes of the withholding tax, the flat tax regime and the corporate income tax.

Capital losses from the disposal, redemption, repayment or assignment of the Notes held as private assets should generally be tax-recognised irrespective of the holding period of the Notes. The losses may, however, not be used to offset other income like employment or business income but may only be offset against investment income subject to certain limitations. Losses not utilised in one year may be carried forward into subsequent years but may not be carried back into preceding years.

According to the view of German tax authorities, losses suffered upon a bad debt loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*) (to the extent the waiver does not qualify as a hidden contribution) shall, in general, not be treated as a sale, so that losses suffered upon such bad debt loss or waiver shall not be deductible for tax purposes. However, in contrast to the view of German tax authorities, the German Federal Tax Court has decided in 2017 that a final bad debt loss with respect to a capital claim shall be deductible for tax purposes; the question whether this also applies to a waiver of a receivable has been left open by the court. With respect to a (voluntary) waiver of receivable a lower German fiscal court confirmed the view of German tax authorities in a final decision and another lower fiscal court rejected the jurisdiction of the German Federal Fiscal Court with respect to the tax deductibility of a bad debt loss. Two further decisions in this context are currently still pending with the German Federal Fiscal Court.

While the German tax authorities previously took the position that a disposal (and, as a consequence, a tax loss resulting from such disposal) shall not be recognized if the Bonds are sold at a market price, which is lower than the transaction costs or if the level of transaction costs is restricted because of a mutual agreement that the transaction costs are calculated by subtracting a certain amount from the sales price, the German tax authorities have recently concluded in an amendment from 10 May 2019 to the tax decree issued by the German Federal Ministry of Finance dated 18 January 2016 that the recognition as disposal shall not depend on the amount of the transaction costs and the sale or redemption proceeds, i.e. even if the transaction costs exceed the sale or redemption proceeds.

While the German tax authorities previously took the position that capital losses shall not be recognised by the German tax authorities if no (or only *de minimis*) payments are made to the individual investors on the maturity or redemption date of the Bonds, the German Federal Fiscal Court has published a decision to the contrary with regard to losses incurred in connection with knock-out certificates. In this decision the German Federal Fiscal Court took the view that exceeding the knock-out threshold (i.e. no payments on the day of exceeding the knock-out threshold) shall be treated similar to a bad debt loss as a sale at the value zero, so that losses suffered shall also be deductible for tax purposes. According to the amendment to the tax decree issued by the German Federal Ministry of Finance dated 18 January 2016 recently published on 16 September 2019, the German Federal Ministry of Finance now also applies the principles of the ruling of the German Federal Fiscal Court.

However, according to the recently published draft bill of the German Federal Government for an annual Tax Act 2019 (*Jahressteuergesetz 2019*) dated 31 July 2019 the view of the federal ministry of finance on the non-deductibility of capital losses for tax purposes in the scenarios described above shall largely be codified in the German Income Tax Act and apply as of 1 January 2020.

Where Notes form part of a trade or business the withholding tax, if any, will not settle the personal or corporate income tax liability. Where Notes form part of a trade or business, interest (accrued) and gains from the disposal, redemption, repayment or assignment of Notes must be taken into account as income. The respective Noteholder will have to report income and related (business) expenses on the tax return and the balance will be taxed at the Noteholder's applicable tax rate. Withholding tax levied, if any, will be credited against the personal or corporate income tax of the Noteholder. Where Notes form part of a German trade or business the current income and gains from the disposal, redemption, repayment or assignment of the Notes may also be subject to German trade tax.

Non-resident Noteholders of the Notes

Interest, including Accrued Interest, and capital gains are not subject to German taxation, unless (i) the Notes form part of the business property of a permanent establishment, including a permanent representative, or a fixed base

maintained in Germany by the Noteholder or (ii) the income otherwise constitutes German-source income. In cases (i) and (ii) a tax regime similar to that explained above under "*Tax resident Noteholders of the Notes*" applies.

Non-residents of Germany are, in general, exempt from German withholding tax on interest and the solidarity surcharge thereon. However, where the interest is subject to German taxation as set forth in the preceding paragraph and the Notes are held in a custodial account with a Disbursing Agent, withholding tax may be levied under certain circumstances. The withholding tax may be refunded based on an assessment to tax or under an applicable tax treaty.

Substitution of the Issuer

If the Issuer exercises the right to substitute the debtor of the Notes, the substitution might, for German tax purposes, be treated as an exchange of the Notes for new notes issued by the Substitute Debtor and subject to similar taxation rules like the Notes. In particular, such a substitution could result in the recognition of a taxable gain or loss for any Noteholder of a Note.

Inheritance and gift tax

The transfer of the Notes to another person by way of gift or inheritance may be subject to German gift or inheritance tax, respectively, if inter alia

- (i) the testator, the donor, the heir, the donee or any other acquirer had his residence, habitual abode or, in case of a corporation, association (*Personenvereinigung*) or estate (*Vermögensmasse*), has its seat or place of management in Germany at the time of the transfer of property,
- (ii) except as provided under (i), the testator's or donor's Notes belong to business assets attributable to a permanent establishment or a permanent representative in Germany.

Special regulations may apply to certain German expatriates.

Other taxes

No stamp, issue, value added, capital transfer or registration taxes or such duties will be payable in Germany in connection with the issuance, delivery or execution as well as the purchase, sale or other disposal of the Notes. However, under certain circumstances entrepreneurs may choose liability to German value added tax with regard to the sale of the Notes to other entrepreneurs which would otherwise be tax exempt. Currently, net assets tax is not levied in Germany.

Foreign Account Tax Compliance Act

Pursuant to certain provisions of the U.S. Internal Revenue Code of 1986, commonly known as FATCA, a "foreign financial institution" may be required to withhold on certain payments it makes ("**foreign passthru payments**") to persons that fail to meet certain certification, reporting, or related requirements. A number of jurisdictions (including Germany) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA ("**IGAs**"), which modify the way in which FATCA applies in their jurisdictions. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as the Notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, such withholding would not apply prior to the date that is two years after the date of publication of final regulations with the U.S. Federal Register defining the term "foreign passthru payments". To date such final regulations have not yet been published. Noteholders should consult their own tax advisors regarding how these rules may apply to their investment in the Notes. In the event any withholding would be required pursuant to FATCA or an IGA with respect to payments on the Notes, the Issuer will not pay any additional amounts as a result of the withholding.

The proposed financial transactions tax (FTT)

The European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax (the "**FTT**"). According to the Commission's Proposal, the FTT shall be implemented in certain EU Member States, including Germany (the "**Participating Member States**").

Pursuant to the Commission's Proposal, the FTT shall be payable on financial transactions provided at least one party to the financial transaction is established or deemed established in a Participating Member State and there is a financial institution established or deemed established in a Participating Member State which is a party to the financial transaction, or is acting in the name of a party to the transaction. The FTT shall, however, not apply to (inter alia) primary market transactions referred to in Article 5(c) of Regulation (EC) No 1287/2006, including the activity of underwriting and subsequent allocation of financial instruments in the framework of their issue. Thus, the issuance of the Notes should not be subject to the FTT.

The rates of the FTT shall be fixed by each Participating Member State but for transactions involving financial instruments other than derivatives shall amount to at least 0.1 per cent. of the taxable amount. The taxable amount for such transactions shall in general be determined by reference to the consideration paid or owed in return for the transfer. The FTT shall be payable by a financial institution established or deemed established in a Participating Member State which is a party to the financial transaction, acting in the name of a party to the transaction or where the transaction has been carried out on its account. Where the FTT due has not been paid within the applicable time limits, each party to a financial transaction, including persons other than financial institutions, shall become jointly and severally liable for the payment of the FTT due.

According to the coalition agreement between the German Christian Democratic Party, the German Christian Social Union and the German Social Democratic Party, the current German government still has the intention to introduce a FTT. In June 2018, Germany and France agreed to further pursue the implementation of a FTT in the EU for which the current French financial transaction tax (which is mainly focused on transactions regarding shares in listed companies with a market capitalization of more than EUR 1 billion), could serve as a role model. Therefore, France and Germany recently presented a common position paper on the introduction of an EU-wide FTT based on the French model to the High Level Working Party at a meeting of the Council of the European Union.

Nevertheless, the FTT remains subject to negotiation between the Participating Member States and was (and most probably will be) the subject of legal challenge. It may still be adopted and be altered prior to its adoption, the timing of which still remains unclear. Moreover, once any directive has been adopted (the "**Directive**"), it will need to be implemented into the respective domestic laws of the still Participating Member States and the domestic provisions implementing the Directive might deviate from the Directive itself. Finally, additional EU Member States may decide to participate.

Prospective holders of the Notes should consult their own tax advisers in relation to the consequences of the FTT associated with subscribing for, purchasing, holding and disposing of the Notes.

SUBSCRIPTION AND SALE OF THE NOTES

Subscription by the Joint Bookrunners

Barclays Bank PLC, Commerzbank Aktiengesellschaft, Goldman Sachs International and J.P. Morgan Securities plc (the "Joint Bookrunners") will enter into a subscription agreement on or about 16 October 2019 (the "Subscription Agreement") in which they agree to subscribe for the Notes on a firm commitment basis. The Joint Bookrunners will be entitled, under certain circumstances, to terminate the Subscription Agreement. In such event, no Notes will be delivered to investors.

The Issuer will agree in the Subscription Agreement to indemnify the Joint Bookrunners against certain liabilities in connection with the offer and sale of the Notes. The Issuer has furthermore agreed to pay certain fees to the Joint Bookrunners in connection with the offering, placement and subscription of the Notes and to reimburse the Joint Bookrunners for certain expenses incurred in connection with the issue of the Notes.

The Joint Bookrunners or their respective affiliates have provided from time to time, and expect to provide in the future, investment services to the Issuer, the Guarantor and their respective affiliates, for which the Joint Bookrunners or their respective affiliates have received or will receive customary fees and commissions. In addition, the Joint Bookrunners or their respective affiliates may be involved in financing initiatives relating to the Issuer, the Guarantor or their respective affiliates. Furthermore, in the ordinary course of their business activities, the Joint Bookrunners and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer, the Guarantor or their respective affiliates. Certain of the Joint Bookrunners or their respective affiliates that have a lending relationship with the Issuer, the Guarantor and/or their respective affiliates, routinely hedge their credit exposure to the Issuer and/or the Guarantor consistent with their customary risk management policies. Typically, such Joint Bookrunners and their respective affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in the Issuer's or the Guarantor's or their respective affiliates' securities, including potentially the Notes offered hereby. Any such short positions could adversely affect future trading prices of the Notes offered hereby. The Joint Bookrunners and their respective affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.
